JSA's and safety-meeting. Discussed days operations of rigging-up-and reptacing-Dateflange-with-new-one-Talked-about-clickline-operations-and-keeping-good

Survey location. Set out all safety equipment. Rigged up pulling unit and set out all necessary tools.

Nippled down B-1 flange and removed it. Installed new B-1 flange with new nipple and master valve. Secured well and nippled up B-1 Flange. Pump truck got stuck on other job so job scope of retrieving profile plug will be in morining. Secured well and shut down. Debuiefed with secure days operations.

LSA's and safety meeting. Discussed days operations of Bill and retrieving blanking plug and rigging downputting unit. Talked over keeping good communication with new concrete.

Spotted in and rigged up slickline operations

RIH with equilizer prong:

6" Rope Socket 1-1/4 OD 10' Weight Bar 1-3/8 OD 6' Short Spanges 1-1/4 OD 1' Equalizer Prong 1-3/8 OD

Prior to punching hole, placed 800 psi on tbg. Punched hole in profile plug. After hole was poked pressure was 650. Prepped to RIH and retrieve plug.

RIH with:

6" Rope Socket 1-1/4 OD 10" Weight bar 1-3/8 OD 1' JDC 1-1/2 OD

atch on to plug. POOH with retrieving tool and 1.50 profile plug.

Rigged down slickline operations. Secured well and debriefed with crew over operations

Riggat down-pulling-unit-Loaded-up-all-equipment-and-cleaned-location-prepped to move to new location

SAK-and-safety-meeting. Discussed days-operations of acidizing well with 6000 gallons of 15% acid. Halked stoom-hazards and pin-pointed shower trailer and newto-point. Talked about emergency exit plans.

Rigged up all lines and equipment for acidizers. Mixed and rolled tank with 190 bbls of fresh water and acid.

Pressure tested lines up 6000 psi. Set pop off to 4800. Well had 800 psi once opened.

Started with fresh water to get injection and then switched to acid. Performed Acid Stimulation job over perfs from 6446' - 6594'. Pumped 6,000 gal 15% NEFe HCI with FDAS.

Average rate was 5.2 bbm, max rate was 5.4 bbm, average PSI was 2850 psi, and max psi was 3300.

Tubing was flushed with 33 bbls of fresh water to bottom perf @ 6594'

ISIP=2001 psi 5 min SIP=1666 psi 10 min SIP=1634 psi 15 min SIP=1608 psi

Total load was 178 bbls.
