13. Describe Proposed or Completed Operation (clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recompleat horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports shall be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompleat in a new interval, a Form 3160-4 shall be filed once testing has been completed. Final Abandonment Notices shall be filed only after all requirements, including reclamation, have been completed, and the operator has determined that the site is ready for final inspection.)

Devon Energy Production Co. L.P. respectfully requests to continue drilling operations with the 9-5/8" TOC at approximately 80 ft-KB or 50 feet from the wellhead. The surface casing shoe was set at 1,523' which leaves us with 1,473' of cement overlap. The cement job was not able to be remediated due to the FMC Uni-head mandrel not being able to become unseated from the A-section of the multi-bowl wellhead after the cement job. This exhausted any options to run 0.75" or 1" pipe to top the cement job off due to insufficient port sizes on the mandrel. After waiting 24 hours for the cement to set up, we pressure tested the casing to 2,765 psi and the 13-3/8" x 9-5/8" annulus to 500 psi with both test yielding satisfactory results.

Attached are the test charts and temperature survey to validate the results.

verbal given 11/30/14

14. I hereby certify that the foregoing is true and correct.
