# Summary of Changes to APD Submission ......

BOP Equipment - CoFlex Hose (Section 3 of 9 Point Drilling Plan in APD)

## BOP Equipment = CoFlex Hose

**Summary:** Variance to use a CoFlex hose between BOP and choke manifold not requested in original submittal.

#### As Defined in APD:

Variance to use CoFlex hose not requested.

#### As Planned on Well:

Chevron requests a variance to use a CoFlex hose with a <u>metal protective</u> covering that will be utilized between the BOP and Choke manifold. Please refer to the attached testing and specification documents.

### <u>Co-Flex line</u> <u>Conditions of Approval</u>

Variance approved to use flex line from BOP to choke manifold. Check condition of flexible line from BOP to choke manifold, replace if exterior is damaged or if line fails test. Line to be as straight as possible with no hard bends and is to be anchored according to Manufacturer's requirements. The flexible hose can be exchanged with a hose of equal size and equal or greater pressure rating. Anchor requirements, specification sheet and hydrostatic pressure test certification matching the hose in service, to be onsite for review. If the BLM inspector questions the straightness of the hose, a BLM engineer will be contacted and will review in the field or via picture supplied by inspector to determine if changes are required (operator shall expect delays if this occurs).
