13. Describe Proposed or Completed Operation (clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recomplate horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports shall be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompletion in a new interval, a Form 3160-4 shall be filed once testing has been completed. Final Abandonment Notices shall be filed only after all requirements, including reclamation, have been completed, and the operator has determined that the site is ready for final inspection.)

Pro Well Testing & Wireline was rigged up on 1/11/06 to run wireline tools to check for a tubing obstruction, and if possible to run a bottom hole pressure survey. A 1 1/2" sinker bar was run in the 2 3/8" tubing on wireline, and a solid obstruction was found at 1374'. The obstruction held all of the weight of the sinker bar. The wireline and sinker bar were pulled out of the tubing and examined for any marks or material on them. Nothing was found. After Pro Well Testing & Wireline had rigged down it was noted that the shut in tubing pressure had increased from 100 psi to 180 psi. The well was opened to flow for a short time and flowed oil. It was shut in to make repairs and calibrate controls on the Gas Production Unit (GPU). The repairs were completed on 1/13/06. The shut in tubing pressure at this time was 500 psi. The well was again opened to flow and made 16.5 barrels of oil in 8 hours. It has subsequently been flowing intermittently, and as of 1/31/06 it had produced a total of 160 barrels of oil. The well is now shut in to obtain a stabilized bottom hole pressure. We plan to have this survey completed by 2/15/06, and then return the well to production.
