Hi Pam,

It has been brought to our attention that when the APD for the above well was originally permitted by Nadel and Gussman Permian, LLC a condition of approve was left off. Offset operators are objecting to this wells location. The stand-off for this pool is 510 from your project area boundary. Without an approved NSL this well cannot produce. If you will be submitting a NSL, please let me know when you have submitted an application for NSL or if you plan on changing the lateral to a standard location. If you are changing the laterals location please submit an amended C-102 and a new directional drill plan.
