In the process of scoping out the work at the Xion Federal #1 reclamation, a spill/leak was detected off the south side of the pad. The contaminated area is 900 ft from the wellhead of the Xion Federal #1, and 635 ft from the wellhead on the Xion Federal #2. The area in question is a roughly 30' by 30' area shown by the highlighted yellow box below.

Chevron will take a backhoe from the Xion Federal #2 out to the spill area and remove all the contaminated soil. Chevron will backfill the hole with caliche and soil, and then re-contour the area. Chevron will then return to work on reclaiming the Xion Federal #1.

Chevron has paid \$1,599 into the Permian Basin Programmatic Agreement. The check was sent on 6/1/2016, and the check number is 0025624592.
