Re: Purvis Operating Co., OGRID 131559, ACO 264
Armadillo State #001, 30-025-38035
Badger State #001, 30-025-38036
Coyote State Com #001, 30-025-38037

Gentlemen:

On February 13, 2011, water samples were attempted on the Badger State #001, Coyote State Com #001 and the Armadillo State #1. The bottom of the hole was dry and no water was available for the Badger State #001 and Coyote State Com #001. There was about 3' of water in the Armadillo and a water sample was obtained for analysis (see attached). The water analysis, when compared to the analysis of a producing fresh water well in the west offset section and when compared to standard drinking water, show no contaminants.

Below is a history of these spud holes and current conditions:

Well	Maximum Depth Drilling with 12 1/4" Bit	Current Measured Depth	Current Reaming Depth with 18" Bit	Current Hole Condition
Badger State #1	80 ft.	46'	46'	Dry
Armadillo State #1	78 ft.	70'	57'	Wet
Coyote State #1	81 ft.	58'	58'	Dry

We plan to start with a 20" bit on our next spud date.

If there is any additional information or questions, please call.

Very truly yours,

Donnie E. Brown
Petroleum Engineer
