13. Describe Proposed or Completed Operation (clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recompleat horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports shall be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompleat in a new interval, a Form 3160-4 shall be filed once testing has been completed. Final Abandonment Notices shall be filed only after all requirements, including reclamation, have been completed, and the operator has determined that the site is ready for final inspection.)

COG Operating LLC, respectfully requests approval for the following changes to the original approved APD.

Operator requests a change to our production casing weight.

Operator will upgrade from 20 ppf 5.5? P110 BTC to 23 ppf 5.5? HCP110 BTC and move the crossover to 5? up to 11482?.

This increases our 23 ppf coupling OD to 6.05?, which violates the 0.422? clearance inside the 7 5/8? intermediate casing (0.4125?).

Additional data for EC transaction #349675 that would not fit on the form

32. Additional remarks, continued

On a different well (Copperhead 31 Federal Com #3H), we secured approval from the BLM to move the 5.5" x 5" crossover to 500' above the 7 5/8" shoe.

This would equal 500' of tie-back at a thickness of 0.656" per side. This would provide us with sufficient cement bond thickness between our production string and 7 6/8" intermediate casing.

See attached.
