proposed completion or recompletion.	npietions: Attach wellbore diagram of
Run MI test to gain extension on temporary abandoned well.	
Due to recent ROZ development in the South Hobbs Unit, it is requested that the Byers A31 be granted a TA extension barring a	
successful MIT. The Byers A31 is a deep well that penetrates through the entire ROZ. ROZ drilling will commence in the South	
Hobbs Unit in Q2 of 2016. This 4-pattern project will help bring an understanding of the ROZ and if the project is successful, the	
ROZ development could be extended field wide. The well bore configuration of the Byers A31 makes it a great candidate to be	
used in this project expansion.
