13. Describe Proposed or Completed Operation: Clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recompleat horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports must be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompleat in a new interval, a Form 3160-4 must be filed once testing has been completed. Final Abandonment Notices must be filed only after all requirements, including reclamation, have been completed and the operator has determined that the site is ready for final inspection.

Chevron has deepened the above well as follows:

11/26/2016 - 01/16/2017

Chevron actually never made it out of the original well bore that apparently had been washed out by the original acid jobs performed, due to the fact that we continually got a percentage of cement back to surface as part of the cutting analysis done by the Mud loggers, as we drilled a sidetrack. This resulted in us tagging up on the packer that we were trying to sidetrack around. We were in an attempt to perform a second sidetrack immediately above the packer, when the cement set up around the workstring as we were setting the second whipstock. Due to small size of the workstring at that depth (17,193') inside casing. At this point, Chevron has decided to T & A the well to further evaluate our options for future operations and Kenneth Hodges/ Drilling engineer has reached out to Chris Walls/BLM for guidance to ensure we met BLM requirements. This is all represented in the

14. I hereby certify that the foregoing is true and correct.
