13. Describe Proposed or Completed Operation: Clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recompleat horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports must be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompleat in a new interval, a Form 3160-4 must be filed once testing has been completed. Final Abandonment Notices must be filed only after all requirements, including reclamation, have been completed and the operator has determined that the site is ready for final inspection.

McElvain Energy Inc. is seeking approval for a temporary extension of the proposed well pad for the EK 30 BS2 Federal Com 1H. The well pad expansion is necessary to accommodate the drilling and completion of 2 additional horizontal 2nd Bone Spring oil wells (EK 30 BS2 Federal Com 2H & the EK 31 BS2 Federal Com 1H) on this pad.

The extra space is necessary for the mobilization of the drilling and completion equipment, and the installation of the additional surface production equipment necessary to support production operations for a 3 well pad.

An Archaeological Survey will also be performed on the proposed extension area and a report will be submitted to the BLM when completed. I have attached the revised survey of the well pad with the
