I am not sure what the problem is for the San Andres completion. On 06/13/2017 I changed the status of your well in the San Andres to "Active" status with an effective date of 01/11/2016. So there should be no problem in reporting production back to 03/01/2016 when the well was completed.

Now are you having a problem with the Wolfcamp completion? Nowhere in any of the paperwork submitted on the well for the date the Wolfcamp completion was plugged. Such as the date when the first plug was set to isolate the Wolfcamp. The date entered into the system for the plug date is 01/04/2017 and is obviously wrong. Once we have an actual date for that plug being set we can submit a service center request to correct that date.

Mr. Kautz,

I have submitted everything that you have requested to finalize the paperwork on this well. I have attached copies for your reference. The amended C-104 showing the correct dates has been sent to you overnight. Can you please look over this and let me know if there is anything else you are missing so we can get this resolved once and for all? The C-105 is already online on the OCD website.

Thank you so much for all of your help!
