Hi April,

The most recent status we have on this well is "Approved Temporary Abandonment" and the latest paperwork we have on this well is that it is not producing. However, UIC paperwork submitted by your field personnel indicates that the well is producing. Production data also indicates that this well is producing. If this well is producing please submit a C-103 and a C-104. The C-103 needs to indicate the date this well returned to production.
