- ☐ All pits have been remediated in compliance with OCD rules and the terms of the Operator's pit permit and closure plan.
- ☒ Rat hole and cellar have been filled and leveled. Cathodic protection holes have been properly abandoned.
- ☐ A steel marker at least 4" in diameter and at least 4' above ground level has been set in concrete. It shows the

OPERATOR NAME, LEASE NAME, WELL NUMBER, API NUMBER, QUARTER/QUARTER LOCATION OR UNIT LETTER, SECTION, TOWNSHIP, AND RANGE. ALL INFORMATION HAS BEEN WELDED OR PERMANENTLY STAMPED ON THE MARKER'S SURFACE.

- ☒ The location has been leveled as nearly as possible to original ground contour and has been cleared of all junk, trash, flow lines and other production equipment.
- ☒ Anchors, dead men, tie downs and risers have been cut off at least two feet below ground level.
- ☒ If this is a one-well lease or last remaining well on lease, the battery and pit location(s) have been remediated in compliance with OCD rules and the terms of the Operator's pit permit and closure plan. All flow lines, production equipment and junk have been removed from lease and well location.
- ☒ All metal bolts and other materials have been removed. Portable bases have been removed. (Poured onsite concrete bases do not have to be removed.)
- ☒ All other environmental concerns have been addressed as per OCD rules.
- ☒ Pipelines and flow lines have been abandoned in accordance with 19.15.35.10 NMAC. All fluids have been removed from non-retrieved flow lines and pipelines.
- ☒ If this is a one-well lease or last remaining well on lease: all electrical service poles and lines have been removed from lease and well location, except for utility's distribution infrastructure.

When all work has been completed, return this form to the appropriate District office to schedule an inspection.

Travis Flemmons
Marshall & Winston

Mr. Flemmons,

Basin Environmental Service Technologies, LLC (Basin), would like to thank you for the opportunity to present Marshall & Winston with this job summary at the Crossroads State 22-3H Tank Battery and well Pad site. The legal description of the site is as follows:

**Crossroads State 22-3H
Lea County, New Mexico
Section 22, Township 09 South, Range 33 East
Latitude 32.5251 North, Longitude -103.5574 West**

Basin has completed reclamation activities for the aforementioned site. These activities included removal of pad and entrance road (approximately 3,500 yd³), as well as removal of approximately 60 yd³ of material from around the wellhead that was disposed of at Gandy Marley Inc. All pad and road material was placed at the adjacent location and stockpiled. The fencing was removed as well as the gate. The fence was reconstructed at the highway to prevent access. The pad and road was then seeded with the preferred seed mix of the rancher, gramma grass, with NMSLO approved seed mix.

Again, Basin would like to thank Marshall & Winston for the opportunity to provide you with this service and look forward to working with you in the future. If you have any questions or concerns, please feel free to contact me at any time.

Respectfully,

Robbie Runnels
