13. Describe Proposed or Completed Operation: Clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recompleat horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports must be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompleat in a new interval, a Form 3160-4 must be filed once testing has been completed. Final Abandonment Notices must be filed only after all requirements, including reclamation, have been completed and the operator has determined that the site is ready for final inspection.

ConocoPhillips request to have the access road out of the SW corner of the dual pad and have the temporary road out of the NW corner of the well pad. The temporary road will be reclaimed after drilling. The access road will be constructed with caliche, and be 14 feet long, with a 30 foot wide ROW for 20 feet of drivable surface and 5 feet on each side in order to accommodate the size of the rig.

There will be no cattle guards, culverts or low water crossings constructed for the access road or temporary road. The roads will be constructed as outlined in the BLM "Gold Book".

When the road travels on fairly level ground, the road will be crowned and ditched with a 2% slope from the tip of the road crown to edge of the driving surface. The ditches will be 3 feet wide with 3:1 slopes.

Approved 06/30/2017 CCR

14. I hereby certify that the foregoing is true and correct.
