13. Describe proposed or completed operations. (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work). SEE RULE 19.15.7.14 NMAC. For Multiple Completions: Attach wellbore diagram of proposed completion or recompletion.

Legacy Reserves Operating, LP request permission to schedule a pressure test on the J. M. Denton #5. The well currently has a CIBP with 2sx cement on top located @ 8,997'. There are no perforations open above the CIBP and cement. The pressure test will be performed as soon as possible after approval is received to proceed with the test.

Upon completing a successful pressure test it is further requested that the J. M. Denton #5 be granted TA'd status for 2 years. This well is a twin to the J. M. Denton #12 which is currently actively producing from the Wolfcamp zone. Legacy Reserves Operating, LP would like to keep this well to utilize as a replacement well in the event the #12 wellbore becomes incapable of use.

PRODUCE OR PLUG WELL. NO PROD.
REPORTED 321 MONTHS.
