13. Describe Proposed or Completed Operation: Clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recompleat horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports must be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompleat in a new interval, a Form 3160-4 must be filed once testing has been completed. Final Abandonment Notices must be filed only after all requirements, including reclamation, have been completed and the operator has determined that the site is ready for final inspection.

The Date of First production for this well was 10/09/2017. The plan was to run tbg within the first 6 months of production. This well is still flowing very strong and has a high bottom hole pressure which would be hard to kill if an attempt to run tbg is made. If the well goes down tbg will be run at that time. If not, EOG respectfully requests a 3 month extension to run tbg in this well.

14. I hereby certify that the foregoing is true and correct.
