	<input type="checkbox"/> Convert to Injection	<input type="checkbox"/> Plug Back	<input type="checkbox"/> Water Disposal	

13. Describe Proposed or Completed Operation: Clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recompleat horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports must be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompleat in a new interval, a Form 3160-4 must be filed once testing has been completed. Final Abandonment Notices must be filed only after all requirements, including reclamation, have been completed and the operator has determined that the site is ready for final inspection.

Chevron USA respectfully requests the following sales line expansion.

The sales gas pipeline at Salado Draw CTB 19 in Section 19, T26S-R33E of South Lea County is currently a 4" carbon steel pipeline. At this pipeline size, at approximately 8 MMSCFD of gas throughput, the pipeline would be at the erosional velocity, i.e. the velocity at which the gas begins to erode the pipeline wall, presenting a significant safety risk.

The forecasted production for CTB 19 includes gas production peaks of 28-31 MMSCFD in June 2019 & 49-56 MMSCFD in July 2020. At these forecasted rates, assuming the Compressor Station is loaded by production from Salado Draw CTB 29, a 10" sales gas pipeline would be sized to ensure Salado Draw CTB 19 is operating safely within its design limits. The sales gas pipeline is contained on the Salado Draw CTB 19 Pad as well as the Salado Draw Pad 3. No new surface disturbance is in scope for

DISCLAIMER: At this time, C. H. Fenstermaker & Associates, L.L.C. has not performed nor was asked to perform any type of engineering, hydrological modeling, flood plain, or "No Rise" certification analyses, including but not limited to determining whether the project will impact flood hazards in connection with federal/FEMA, state, and/or local laws, ordinances and regulations. Accordingly, Fenstermaker makes no warranty or representation of any kind as to the foregoing issues, and persons or entities using this information shall do so at their own risk.

NOTE:

Many states maintain information centers that establish links between those who dig (excavators) and those who own and operate underground facilities (operators). It is advisable and in most states, law, for the contractor to contact the center for assistance in locating and marking underground utilities. For guidance: New Mexico One Call System - www.nmonecall.org.

NOTE:

Please be advised, that while reasonable efforts are made to locate and verify pipelines and anomalies using our standard pipeline locating equipment, it is impossible to be 100 % effective. As such, we advise using caution when performing work as there is a possibility that pipelines and other hazards, such as fiber optic cables, PVC pipelines, etc. may exist undetected on site.
