13. Describe Proposed or Completed Operation: Clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recomple horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports must be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recomple in a new interval, a Form 3160-4 must be filed once testing has been completed. Final Abandonment Notices must be filed only after all requirements, including reclamation, have been completed and the operator has determined that the site is ready for final inspection.

Kaiser Francis Oil Company is proposing to move the SHL location of the Red Hills 101H to 2185 FSL and 1008 FSL. Let it be noted that the originally approved APD pad dimensions will not change. Moving SHL will give the rig adequate room to safely operate on the location and give room for truck traffic. Attached is an updated plat with new surface calls. Shape files can be delivered upon request.
