13. Describe Proposed or Completed Operation: Clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recomplete horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports must be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompletion in a new interval, a Form 3160-4 must be filed once testing has been completed. Final Abandonment Notices must be filed only after all requirements, including reclamation, have been completed and the operator has determined that the site is ready for final inspection.

ConocoPhillips Company respectfully requests approval for off-lease storage, measurement and sales for our Peridot development because the facility is located outside the communitized area. This facility location was included in the applications for permit to drill for the Peridot 8 Federal 1H, 2H and 3H.

Federal royalty will not be reduced by approving this request. Measurement of oil and gas will be done in compliance with 43 CFR 3173, 3174, and 3175. Measurement will take place at the facility as noted in the Plot Plan attached. Meter numbers will be provided on the Site Facility Diagram following installation.

The application package sent to NM Oil Conservation Division is also attached.

Conditions of Approval  
ConocoPhillips Company  
Peridot 8 Federal 1H-8H & 11H-18H  
All wells are located in 2086.8-acre CA NMNM138364  
CTB is nearest to the 8H/18H well pad**

**Approval of off-lease/CA measurement is subject to the following conditions of approval:**

1. This agency shall be notified of any change in sales method or location of the Sales point.
2. This agency shall be notified of any spill or discharge as required by NTL-3A. No gas may be vented/flared without proper measurement and prior approval. Any gas vented must be flared.
3. All gas and oil subject to royalty shall be measured as per federal regulations and shall be reported to ONRR as required. All gas which is vented, flared or used on lease shall be reported as per 43 CFR 3179 to ONRR. All gas which is vented or flared shall be subject to royalty, unless prior approval was given by the authorized officer. These volumes are royalty bearing and shall be reported on OGOR "B" as disposition code "33" for royalty-bearing flared gas and disposition code 63 for royalty-bearing vented gas.  
DC 33 = Flared gas – royalty due  
DC 63 = Vented gas – royalty due
4. This agency reserves the right to modify or rescind approval whenever it determines continued use of the approved method may adversely affect the surface or subsurface environments and/or product accountability.
5. This approval is subject to like approval by the New Mexico Oil Conservation Division.
6. Additional wells require additional approvals.
7. This approval does not constitute right-of-way approval for any off-lease/Unit activities. Within 30 days, an application for right-of-way approval must be submitted to the Realty Section if not already done.
8. Approval for off-lease/CA from various sources is a privilege which is granted to lessees/operators for the purpose of aiding conservation and extending the economic life of leases. Applicants should be cognizant that failure to operate in accordance with the provisions outlined in the Authorized Officer's conditions of approval and/or subsequent stipulations or modifications will subject such approval to revocation.

**PERIDOT 8 FEDERAL CF1 TANK BATTERY  
APPLICATION FOR OFF LEASE MEASUREMENT, STORAGE, SALES**

ConocoPhillips Company is requesting approval to combine Yeso production from the wells listed below through the Peridot 8 Federal CF1 Tank Battery. The battery is located outside of the proposed Communitized Agreement area, so approval of off lease measurement and storage for sales is requested. The facility location was chosen to preserve future well locations, avoid existing infrastructure, avoid stranding offset resources, and avoid habitat of concern. The following is a list of wells and the producing leases. Additional wells to be located in Sec 5 or Sec 6, T17S, R32E may be added later.

The BLM's interest in these leases is different. Lease NMLC029406B royalty rate is 12.5% (sliding scale), Lease NMLC058775 royalty rate is 12.5% (sliding scale), Lease NMLC061434 royalty rate is 12.5% (sliding scale), NMLC097887 royalty rate is 12.5% (sliding scale). Serial register pages for the leases are in Appendix A.

Map 1 shows the federal leases and well locations in Section 8, T17S, R32E.

**Oil & Gas metering:**

The central tank battery location in NWNE, Sec 8, T17S, R32E is on lease NMLC058775 but outside of the communitized area shown on Map 2. There are three oil tanks at the Central tank battery that the wells will utilize and for gas they will have a common central delivery point (CDP) gas sales meter (Durango Midstream) which is located at the facility in the NWNE, Sec. 8 T17S, R32E. The produced water will go to a common water tank on location before being transferred to a saltwater disposal well, the Elvis #1 SWD.

The oil production will be sold downstream of the oil tanks via LACT at the facility and trucked by Holly Frontier. Their most probable offload location is their Maljamar Unloading Station located at 32.857726, -103.79636.

Gas production will be allocated, using the subtraction method from allocation meters downstream of a 3-phase separator and heater treater.

These meters will be calibrated on a regular basis per API, BLM, and NMOCD specifications. The BLM and NMOCD will be notified of any future changes in the facilities in accordance with 43 CFR 3173.

**Process and Flow Descriptions:**

The flow of production is shown broadly on Map 3 and on the enclosed facility diagram which shows location of wells and flow lines, the facility, and oil and gas sales meter points. The combining of this production is the most effective economical means of producing reserves and will not result in reduced royalty or improper measurement of production. The proposed off lease measurement for sales will reduce operating expenses as well as reduce the surface facility footprint and overall emissions.

The production from the initial three wells will be routed to the Peridot 8 Federal CF1 Tank Battery (NWNE, Sec 8, T17S, R32E) where each well will flow through a production header and rotated through test or bulk separation and heater treater. Wells will be rotated through the test train periodically for individual well measurement. After separation, the oil, gas, and water will go to common oil tanks, water tank, and gas CDP located at the facility.

Working, royalty, and overriding interest owners have been notified of this proposal via certified mail.

ConocoPhillips Company, understands the requested approval will not constitute granting of any right-of-way or construction rights not granted by the lease instrument. Applications for specific right of ways have been submitted.

ConocoPhillips Company, further understands that approval of this request will not constitute granting of a communitization agreement. The communitization agreement has been submitted and approved separately.

OFF-LEASE MEASUREMENT

**Administrative Order OLM-165**

ConocoPhillips Company  
Attention: Susan Maunder

ConocoPhillips Company (OGRID 217817) ("Applicant") is hereby authorized to transport and measure oil and gas production off-lease, from the following wells which produce from the Yeso formation, Maljamar; Yeso, West Pool (Pool Code 44500) in Lea County, New Mexico:

**The 16 Peridot 8 Federal wells as listed in detail on Applicant's Attachment "A"**

It is understood these wells are or will be located on a proposed BLM Communitized Agreement Area containing several BLM leases at differing royalty rates; however, the battery and sales points are to be located outside this Area.

The oil and gas production from these wells will be measured at, and sold from, a central tank battery location in the NWNE of Section 8, Township 17 South, Range 32 East, NMPM, Lea County, New Mexico.

All meters for the above-referenced well shall be physically separated from facilities for other wells, so that production from the above-referenced wells will not be commingled prior to measurement with production from any other well.

**This permit does not authorize the surface commingling of this oil and gas production with oil and gas production from other pools or leases.**

It is also understood that you have given due notice of this application to all working interest owners who are "affected persons," as defined in Division Rule 19.15.23.9 (A) NMAC.

Applicant has included in its application and notice the intention to add additional future wells located in Sections 5 or 6 of this Township. If those wells are added, the operator shall notify the Division by Sundry Notice of each well (with API number) being added to this permitted Off Lease Measurement.

The approval is subject to like approval by the Bureau of Land Management. The operator shall notify the Hobbs District Office of the Division before commencement of Off-Lease Measurement.
