**FACILITY DIAGRAM**  
Shows: Major equipment, vessels, process piping, and valves  
Not shown: Auxiliary process systems such as pilot gas system, roll lines, vent lines, and small drain lines  
**PRODUCTION PHASE:** All valves that provide access to production are effectively sealed in the closed position.  
**SALES THROUGH LACT UNITS:** Sale is measured through LACT units. All other valves that provide access to production (load-out valves) are effectively sealed in the closed position.  
**WATER TANKS:** If the possibility for oil to enter water tanks exists through common recirculating or equalizing lines, oil tanks are isolated from water tanks by valves effectively sealed in the closed position.

Facility Overview: Please see pages 2 through 3 for details.
