13. Describe Proposed or Completed Operation: Clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recomple horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports must be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recomple in a new interval, a Form 3160-4 must be filed once testing has been completed. Final Abandonment Notices must be filed only after all requirements, including reclamation, have been completed and the operator has determined that the site is ready for final inspection.

ConocoPhillips Company respectfully provides this notice to defer reclamation activities on a portion of this location. There is a monitoring well at the southeast corner of the location. The contractor using the monitoring well has requested the road be left in place to provide access. An aerial image is attached which depicts our plans to leave an access road.

This has been discussed with Jim Amos on 2/25/2020 at 12:10, who gave verbal approval for this proposal.

Thank you for your time spent reviewing this request.
