13. Describe Proposed or Completed Operation (clearly state all pertinent details, included estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recompleat horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports shall be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompleat in a new interval, a Form 3160-4 shall be filed once testing has been completed. Final Abandonment Notices shall be filed only after all requirements, including reclamation, have been completed, and the operator has determined that the site is ready for final inspection.)

Currently oil, gas, and water from our Pipeline B 5 Fed # 2 in the NE/4SW/4 of 5-19S-34E flows through a 3" SDR-7 poly line to the tank battery of our Pipeline Deep Fed Com 5 # 1 in the SE/4SW/4 of 5-19S-34E. Both wells are E-K Bone Spring producers with common ownership. From there the the gas stream flows offlease through buried 2 7/8" steel pipeline and ties in to the DCP low pressure system off our Pipeline Deep Fed Com # 1 well pad in SW/4NE/4 of 7-19S-34E. See attached topo. This line was built by a previous operator and follows existing roads. We are requesting approval of offlease measurement since this line is already in place and due to the estimated cost of a DCP low pressure tie in of around \$50,000. ROW has been applied for under separate cover.

* Gas measurement Required on lease (allocation meter). Subject to like approval from OCD.
