

6. Sources of Construction Materials
 - A. Any caliche required for construction of the drilling pad will be obtained from an existing pit on Federally owned surface shown on Exhibit B.
7. Methods of Handling Waste Disposal
 - A. Drill cuttings will be disposed of in the reserve pits.
 - B. Drilling fluids will be allowed to evaporate in the reserve pits until the pits are dry.
 - C. Water produced during operations will be collected in tanks until hauled to an approved disposal system or a separate disposal application will be submitted to the USGS for appropriate approval.
 - D. Oil produced during operations will be stored in tanks until sold.
 - E. Current laws and regulations pertaining to the disposal of human waste will be complied with.
 - F. Trash, waste paper, garbage and junk will be buried in the reserve pit and covered with a minimum of 24 inches of dirt. All waste material will be contained to prevent scattering by the wind.
 - G. All trash and debris will be buried or removed from the wellsite within 30 days after finishing drilling and/or completion operations.
8. Ancillary Facilities
 - A. None required.
9. Well Site Layout
 - A. Exhibit D shows the dimensions of the well pad and reserve pits and the location of major rig components.
 - B. The ground surface at the drilling location is basically flat plain. No cutting will be required to level the pad area which will be covered with at least six inches of compacted caliche.
10. Plans for Restoration of the Surface
 - A. After finishing drilling and/or completion operations, all equipment and other material not needed for further operations will be removed. The location will be cleared of all trash and junk, to leave the wellsite in as aesthetically pleasing a condition as possible.
 - B. Unguarded pits, if any, containing fluids will be fenced until they have been filled.
 - C. If the proposed well is non-productive, all rehabilitation and/or vegetation requirements of the Bureau of Land Management and the United States Geological Survey will be complied with and will be accomplished as expeditiously as possible. All pits will be filled and leveled within 90 days after abandonment.
