Dear Mr. Chester:

Pursuant to your letter dated February 12, 1990 we have enclosed an original and six (6) copies of the Completion Report (3160-4). Also enclosed are two (2) Dual Spaced Neutron Logs (the only logs run) and two (2) copies of drilling time tables.

Although the lease (NM-52629) terminated, Manzano was the successful bidder for the same lease tract on the January Federal Land sale. After the lease has been issued and Manzano makes definite plans with the well bore we will submit the appropriate Sundry Notice. Until then, the well shall remain in a temporary abandoned status.

If you have any questions please do not hesitate to call.
