OIL CONSERVATION COMMISSION

HOBBES, NEW MEXICO 88240

The Commission has received your letter of the 10th day of
 August, 1968, regarding the proposed drilling of an oil well
 on the land owned by you, located in the Hobbes, New Mexico
 area. The Commission is currently reviewing the information
 submitted to it and will advise you of its findings in due
 time. In the meantime, you are advised that the Commission
 is authorized to require the drilling of a test well to
 determine the presence of oil and gas in the area. If you
 desire to drill a test well, you must first obtain a permit
 from the Commission. The permit application should be
 submitted to the Commission, together with the required
 fee. The Commission will then conduct an inspection of the
 proposed well site and, if necessary, require the drilling
 of a test well. The Commission will also require the
 drilling of a test well if it determines that there is a
 reasonable possibility of oil and gas in the area.
