The elevation of the derrick floor above sea level is _____ ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

It is our intention to drill a well at the above location to a total approximate depth of 4150' to attempt a completion in the Grayburg-San Andrea horizon. All casing paints will be comented in accordance with approved methods of the USGS, and any special requirements will be complied with.

It is planned to use the following easing pattern: 11" hole, 7 5/8" casing to be set 4 950° and camented w/475 sacks. Cament is to circulate. 6 3/4" hole, 4 1/2" casing to be set at 4050° and camented w/225 sacks. Cament is to return to 1950°.

Approval to produce this well upon completion is also requested.

Verbal approval received from Mr. A. R. Brown this date.

Company	Continental Cil Com	e approval in writing by the Geological Survey before operations may be commenced.
