

NEW MEXICO OIL CONSERVATION COMMISSION  
SANTA FE, NEW MEXICO

MISCELLANEOUS NOTICES

RECEIVED  
JAN 18 1951  
OIL CONSERVATION COMMISSION  
HOBBBS OFFICE

Submit this notice in triplicate to the Oil Conservation Commission or its proper agent before the work begins. A copy will be returned to the sender on which will be given the approval, with any modifications considered advisable, or the rejection by the Commission or agent, of the plan submitted. The plan as approved should be followed, and work should not begin until approval is obtained. See additional instructions in the Rules and Regulations of the Commission.

Indicate nature of notice by checking below:

NOTICE OF INTENTION TO TEST CASING SHUT-OFF		NOTICE OF INTENTION TO SHOOT OR CHEMICALLY TREAT WELL	
NOTICE OF INTENTION TO CHANGE PLANS		NOTICE OF INTENTION TO PULL OR OTHERWISE ALTER CASING	X
NOTICE OF INTENTION TO REPAIR WELL		NOTICE OF INTENTION TO PLUG WELL	
NOTICE OF INTENTION TO DEEPEN WELL			

Artesia, New Mexico

Place

Date

OIL CONSERVATION COMMISSION,  
Santa Fe, New Mexico.

Gentlemen:

Following is a notice of intention to do certain work as described below at the  
David C. Saikin, et al Texas State "B" Well No. 3 in E/2 SW/4 NW/SE  
 Company or Operator Lease  
 of Sec. 16, T. 20, R. 32, N. M. P. M., Halfway Field.  
Lea County.

FULL DETAILS OF PROPOSED PLAN OF WORK  
FOLLOW INSTRUCTIONS IN THE RULES AND REGULATIONS OF THE COMMISSION

Plan to pull 1100 feet collapsed 7" casing, run 2500' 5 1/2" Seamless 14# - Cement 100 Sax.

Approved JAN 18 1951, 19\_\_\_\_  
except as follows:

David C. Saikin, et al  
Company or Operator  
By S. O'Donnell  
Position Authorized Agent  
Send communications regarding well to  
Name Shelia O'Donnell  
Address P. O. Box 96  
Artesia, New Mexico

OIL CONSERVATION COMMISSION  
By Mary Yankovsky  
Title Oil & Gas Inspector

See board file for letter of March 23, 1951  
Plugging well

REPORT OF THE RESEARCH GROUP ON THE CHEMISTRY OF THE SOLID STATE

ANNUAL REPORT FOR THE YEAR 1964

The research group on the chemistry of the solid state has been active in a number of areas during the past year. The major areas of activity have been in the study of the structure and properties of crystalline and amorphous solids, and in the study of the kinetics of solid state reactions. The following is a summary of the work done during the year.

The first part of the report deals with the study of the structure and properties of crystalline and amorphous solids. The work in this area has been carried out by the following members of the group: [List of names]. The results of this work are presented in the following sections.

The second part of the report deals with the study of the kinetics of solid state reactions. The work in this area has been carried out by the following members of the group: [List of names]. The results of this work are presented in the following sections.

The third part of the report deals with the study of the structure and properties of crystalline and amorphous solids. The work in this area has been carried out by the following members of the group: [List of names]. The results of this work are presented in the following sections.

The fourth part of the report deals with the study of the kinetics of solid state reactions. The work in this area has been carried out by the following members of the group: [List of names]. The results of this work are presented in the following sections.

The fifth part of the report deals with the study of the structure and properties of crystalline and amorphous solids. The work in this area has been carried out by the following members of the group: [List of names]. The results of this work are presented in the following sections.

The sixth part of the report deals with the study of the kinetics of solid state reactions. The work in this area has been carried out by the following members of the group: [List of names]. The results of this work are presented in the following sections.

The seventh part of the report deals with the study of the structure and properties of crystalline and amorphous solids. The work in this area has been carried out by the following members of the group: [List of names]. The results of this work are presented in the following sections.
