Continue Temporarily Abandoned Status

(Note: Report results of multiple completion on Well Completion or Recompletion Report and Log form.)

13. Describe Proposed or Completed Operations (Clearly state all pertinent details, and give pertinent dates, including estimate date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)*

EMSU-B #896 is an expired, formerly BLM approved temporarily abandoned well in the Eunice Monument South Unit - B. The following is offered as justification for continuation of temporarily abandoned status on EMSU-B # 896: Currently the EMSU-B #896 is a temporarily abandoned well in Eunice Monument South Unit - B, a flood currently in the "pre-fillup" stage of production. The wellbore was temporarily abandoned by setting a cement bridge plug at 3600', capped with 35' of cement, in May 1992. At this time the casing was successfully tested to 500 psi. The Eunice Monument South Unit - B has future plans for waterflood pattern realignments and possibly, a future CO2 project. It is requested that this wellbore be allowed to remain temporarily abandoned until its beneficial use is realized through one of the afore-mentioned future projects. During the duration of EMSU-B #896's temporary abandoned status, casing integrity tests will be performed as prescribed by BLM requirements. Casing integrity and bradenhead tests will be performed during May 1995 and your office will be notified within 48 hours of said tests.

14. I hereby certify that the foregoing is true and correct
