Re: LDNGC Toro 33 State Well No. 1  
Property Code 23412  
UL G, Sec. 33-19S-35E  
Lea County, New Mexico

Gentlemen:

An amended Application for Permit to Drill (Form C-101) for the referenced well is attached. The previous applications proposed cementing the 5 1/2" casing back to the 9 5/8" casing string. We have reached TD of 13,322', which is deeper than originally estimated, and plan to run the 5 1/2" casing immediately. We have revised the cement program and intend to cement back to the top of the Wolfcamp at 10,000'.

Louis Dreyfus Natural Gas Corp. hereby submits the revised plan and requests your approval of same. Should you have any questions concerning the enclosed, or need additional information, please feel free to call me at (405) 749-5287. I may also be reached by fax at (405) 749-6689.

Thank you for your assistance with this matter.

Sincerely,

LOUIS DREYFUS NATURAL GAS CORP.

Terrye D. Bryant  
Regulatory Technician

enc.

*Gary - I spoke to the drilling engineer about the Wolfcamp - he agreed with you about cementing over it. Said top of Wolfcamp was actually at 10,800' and we would cement 800' above. TB CLK*
