

- (c) Set a production packer below the perforations in the Eumont Gas Pool and above the Monument Pool completion to separate the two zones. A side-door landing nipple with a "straight-through tool" will be installed in the tubing string above the packer so that the "straight-through tool" may be replaced with a side door choke when it is necessary to have access to the upper zone through the tubing.
 - (d) Produce the Monument Pool oil through the tubing and the Eumont Pool gas through the tubing-casing annulus.
4. Dual completion of this well to produce gas from the Eumont Pool and oil from the Monument Pool is in the interest of conservation and of the protection of correlative rights.
 5. The applicant will comply with all rules and regulations of the New Mexico Oil Conservation Commission to maintain separation of production from the two zones.
 6. The manner and method of the proposed dual completion is mechanically feasible and practical.
 7. All offset operators have been notified of the proposal to dual complete by a copy of this letter.

It is requested that permission be granted to dually complete the subject well as proposed in this application.

Yours very truly,

GENERAL CRUDE OIL COMPANY

F. A. Hunter
District Production Supt.

(b) Set a protection packer below the perforation in the formation and above the cement foot completion to separate the two zones. A side-door landing nipple with a "through-the-hole" design will be installed in the tubing string above the packer so that the "through-the-hole" packer may be replaced with a side door choke when it is necessary to have access to the upper zone through the tubing.

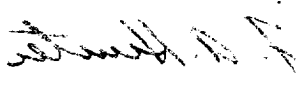

(c) Produce the formation foot off through the tubing and the cement foot gas through the side-door landing nipple.

- 1. The completion of this well to produce gas from the formation and all other formations in the vicinity of completion and of the protection of completion.
- 2. The applicant will comply with all rules and regulations of the New Mexico Oil Conservation Commission to maintain separation of production from the two zones.
- 3. The nature and extent of the proposed well completion is hereby deemed feasible and practical.
- 4. All other operations have been notified of the proposal to this company by a copy of this letter.

It is requested that permission be granted to duplicate copies of this letter as provided in this application.

Yours very truly,

GENERAL CRUDE OIL COMPANY
