Attention: Mr. A. I. Porter, Director

Application of Continental Oil Company for administrative approval of dual completion in an undesignated Tubb Gas Pool and the Warren Drinkard Oil Pool of the Warren Unit Drinkard Well No. 9, Section 27, T-20-S, R-38-E, N.M.P.M., Lea County, New Mexico

Gentlemen:

Continental Oil Company respectfully requests administrative approval under the provisions of Rule 112-A of the Rules and Regulations of the New Mexico Oil Conservation Commission for the dual completion of its Warren Unit Drinkard No. 9 well, located 1980 feet from the North line and 660 feet from the West line of Section 27, T-20-S, R-38-E, N.M.P.M., Lea County, New Mexico, for the production of oil from the Warren Drinkard Oil Pool and gas from an undesignated Tubb Gas Pool, and in support thereof states:

1. Applicant is operator for the Warren Unit which includes, among other lands, Section 27, T-20-S, R-38-E, Lea County, New Mexico.
2. Applicant drilled and completed on July 2, 1951, its Warren Unit Drinkard Well No. 9 as an oil well in the Drinkard formation.
3. Applicant proposes to open the Tubb section in said well and produce Tubb gas through one-inch tubing while producing the Drinkard oil through two-inch tubing. Separation of fluids from the two pools will be effected by means of appropriate packers. A diagrammatic sketch of the proposed dual completion is attached hereto, showing the formations involved, perforations present and proposed, approximate location of packer, and other information pertinent to the dual completion.
4. The well will be equipped in such a manner that there will be no commingling of fluids from the two common sources of supply and that each of them can be tested separately in the well, as required by the Commission.
