17. Describe Proposed or Completed Operations (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work) SEE RULE 1103.

This well was a Blinebry gas well and has been temporarily abandoned since 1976. On June 1, 1985, a workover was begun to add perforations and reactivate the Blinebry formation. On June 3, a GR-CBL-CCL was run from PBTD 7351' to 4900'. The Blinebry was perforated at 5832, 38, 66, 78, 90, 5903, 20, 35, 42, 54, and 62 with 2 jet shots per foot (22 holes). These new perforations were then acidized with 1500 gallons of 15% HCl using ball sealers for divert. On June 5, attempted to sand frac old and new interval (5729 - 5962), but it screened out. The next day, this interval was acidized with 5000 gallons of 15% HCl. Then it was frac'ed with 50,000 gallons of Pur-Gel 30 containing 107,500# 20/40 sand. Well is now being swab tested.

18. I hereby certify that the information above is true and complete to the best of my knowledge and belief.
