Re: Intentional deviation of Sirgo-Collier
Penrose B No. 67
Langlie-Mattix Field

Dear Sirs,

While attempting to core the Queen formation in the subject well, a core barrel was lost in the hole at a depth of 3644 feet. After numerous attempts to fish this barrel, a cement plug was set over the depths 3644 to 3231 and the well was deviated around the junk in hole (see attached schematic) to a total depth of 3870 feet.

Sincerely,

ODEX Drilling, Inc.

D. Kirk Edwards
