Well No. 825 is located 990 ft. from {N} line and 990 ft. from {E} line of sec. 25

S&W 381 Sec. 25 (1/4 Sec. and Sec. No.)      23S (Twp.)      77E (Range)      N. M. P. M. (Meridian)  
Justis Fusselman (Field)      Lea (County or Subdivision)      New Mexico (State or Territory)

The elevation of the derrick floor above sea level is 3350 ft. Approx.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

We propose to drill a well using rotary tools to approximately 4350', more or less, to explore for commercial production in the Fusselman formation. It is proposed to set 11 3/4" casing into the top of the anhydrite formation at approximately 3510' cementing the casing to surface. It is proposed to set 7" casing to total depth of commercial production cementing same fr. bottom to base of salt at approximately 3150'. State and Federal regulation will be complied with.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
