ADMINISTRATIVE APPLICATION CHECKLIST

THIS CHECKLIST IS MANDATORY FOR ALL ADMINISTRATIVE APPLICATIONS FOR EXCEPTIONS TO DIVISION RULES AND REGULATIONS WHICH REQUIRE PROCESSING AT THE DIVISION LEVEL IN SANTA FE

Applicant: Matador Production Company **OGRID Number:** 228937
Well Name: Orders CTB-827 & CTB-839 **API:** 30-015-44082; 30-015-44472
Pool: Purple Sage Wolfcamp (Gas) Pool **Pool Code:** 98220

SUBMIT ACCURATE AND COMPLETE INFORMATION REQUIRED TO PROCESS THE TYPE OF APPLICATION INDICATED BELOW

1) TYPE OF APPLICATION: Check those which apply for [A]

A. Location – Spacing Unit – Simultaneous Dedication

☐ NSL ☐ NSP (PROJECT AREA) ☐ NSP (PRORATION UNIT) ☐ SD

B. Check one only for [I] or [II]

[I] Commingling – Storage – Measurement

☐ DHC ☒ CTB ☐ PLC ☐ PC ☐ OLS ☐ OLM

[II] Injection – Disposal – Pressure Increase – Enhanced Oil Recovery

☐ WFX ☐ PMX ☐ SWD ☐ IPI ☐ EOR ☐ PPR

2) NOTIFICATION REQUIRED TO: Check those which apply.

- A. ☒ Offset operators or lease holders
 B. ☒ Royalty, overriding royalty owners, revenue owners
 C. ☒ Application requires published notice
 D. ☐ Notification and/or concurrent approval by SLO
 E. ☐ Notification and/or concurrent approval by BLM
 F. ☐ Surface owner
 G. ☒ For all of the above, proof of notification or publication is attached, and/or,
 H. ☐ No notice required

FOR OCD ONLY

- ☐ Notice Complete
☐ Application Content Complete

3) CERTIFICATION: I hereby certify that the information submitted with this application for administrative approval is **accurate** and **complete** to the best of my knowledge. I also understand that **no action** will be taken on this application until the required information and notifications are submitted to the Division.

Note: Statement must be completed by an individual with managerial and/or supervisory capacity.

Re: Application of Matador Production Company to amend Administrative Order CTB-839: (1) to add additional leases currently approved under Order CTB-827; (2) to authorize pool and lease commingling, off-lease storage, off lease measurement, and off-lease marketing at the Michael Collins North Tank Battery located in the SE/4 NE/4 (Unit H) of Section 11, Township 23 South, Range 27 East, NMPM, Eddy County, New Mexico for the additional leases; and (3) to allocate production by well test method.

Dear Ms. Sandoval:

Matador Production Company seeks to amend Administrative Order CTB-839. Under Order CTB-839 attached as **Exhibit 1**, the Division approved lease commingling, off-lease storage, and off-lease measurement, at the **Michael Collins North Tank Battery** of production from the following leases:

(a) The 320-acre standard spacing unit comprised of the N/2 of Section 11, Township 23 South, Range 27 East. The spacing unit is currently dedicated to the **Michael Collins 11-23S-27E RB #206H well** (API No. pending). This well is producing from the Purple Sage; Wolfcamp (Gas) Pool (98220). This spacing unit is subject to compulsory pooling Order No. R-14332.

(b) The 320-acre standard pooled spacing unit comprised of the N/2 of Section 12, Township 23 South, Range 27 East. The spacing unit is currently dedicated to the **Miss Sue 12-23S-27E RB #202H well** (API No. 30-015-44433). This well is producing from the Purple Sage; Wolfcamp (Gas) Pool (98220). This spacing unit is subject to compulsory pooling Order No. R-14482.

Matador seeks to vacate the terms of Order CTB-827, also attached as **Exhibit 1**, which allowed for commingling of the Wolfcamp formation in the S/2 of Sections 11 and 12, Township 23 South, Range 27 East.

Pursuant to 19.15.12.7 NMAC, Matador seeks to amend the terms of Order CTB-839 to combine production from the following leases and wells currently approved for commingling under Order CTB-839 as wells as under Order CTB-827 at the Michael Collins North Tank Battery:

(a) The 320-acre standard spacing unit comprised of the S/2 of Section 11. The spacing unit is currently dedicated to the **Michael Collins 11-23S-27E RB #208H well** (API No. 30-015-44082) and the **Michael Collins 11-23S-27E RB # 203H well** (API No. 30-015-44443). These wells are producing from the Purple-Sage; Wolfcamp (Gas) Pool (98220). The S/2 of Section 11 is a pooled spacing unit, subject to compulsory pooling order R-14333.

(b) The 320-acre standard spacing unit comprised of the S/2 of Section 12. The spacing unit is currently dedicated to the following two horizontal wells: the **Tom Walters 12-23S-27E RB #203H well** (API No. 30-015-43147), and the **Tom Walters 12-23S-27E RB #208H well** (30-015-44197). The **Tom Walters 12-23S-27E RB #203H well** produces from the Purple Sage; Wolfcamp (Gas) Pool (98220)); the **Tom Walters 12-23S-27E RB #208H well** is producing from the Purple Sage; Wolfcamp (Gas) Pool (98220).

(c) The 320-acre standard spacing unit comprised of the N/2 of Section 11. This spacing unit is currently dedicated to the following horizontal wells: **Michael Collins 11-23S-27E RB #201H well** (API No. 30-015-44623) and the **Michael Collins 11-23S-27E RB #206H well** (API No. 30-015-44472). These wells are producing from the Purple Sage; Wolfcamp (Gas) Pool (98220).

(d) The 320-acre standard spacing unit comprised of the N/2 of Section 12. This spacing unit is currently dedicated to the following two horizontal wells: **Miss Sue 12-23S-27E RB #201H** (API No. 30-015-44622) and the **Miss Sue 12-23S-27E RB #202H** (API No. 30-015-44433). These wells are producing from the Purple Sage; Wolfcamp (Gas) Pool (98220).

The **Michael Collins North Tank Battery** is located in the SE/4 NE/4 (Unit H) of Section 11. **Exhibit 2** is a land plat showing Matador's current development plan, flow lines, wellbores, existing spacing units and central tank battery ("production facility") in the subject area.

Exhibit 3 is a C-102 for each of the wells that are permitted or drilled within the existing spacing units currently approved under CTB-839 and CTB-827, the wells to be added under this application, and the available six-month production reports.

June 21, 2021
Page 3

Exhibit 4 is a completed Application for Surface Commingling (Diverse Ownership) Form C-107-B, that includes a statement from Omar Enriquez, P.E., Sr. Production Engineer with Matador, identifying the facilities and the measurement devices to be utilized, a detailed schematic of the surface facilities (attachment A to the statement) and a referenced gas sample (attachment B to the statement).

Matador seeks approval to meter and store production from each of these leases at an off-lease location and allocate production to each lease/spacing unit using a well test method from leases and spacing units currently approved under Order CTB-839, in addition to production from the leases and spacing units approved under Order CTB-827 that Matador seeks to include under the terms of Order CTB-839. This well test method is permitted by 19.15.12.10.B(1)(a) NMAC for areas of uniform ownership, but approval from the Division is required for use of the well test method in an area of diverse ownership.

Matador's proposed well-test method is limited to the existing and future wells drilled on the leases and spacing units subject to this application and will incorporate a well-known industry methodology. Each well drilled included in this application will flow through a three-phase "test" separator that measures oil, gas, and water for a period of 72-hours. A 72-hour test will be performed on each well on a monthly basis and will be used to calculate an allocation factor for oil, gas, and water. The total production for these wells will be multiplied by the allocation factors in order to obtain the individual production from each well. Matador believes that the well test method for the currently approved commingling under Orders CTB-827 and CTB-839 (as combined herein) will not adversely impact interest owners and will allow Matador to lower its lease operating expenses, thereby extending the economic lifespan of these wells. Furthermore, this well test method will allow the consolidation of surface equipment that will lead to a decreased environmental footprint. A detailed description of Matador's timing and proposed well test method for this additional lease is included in the C-107B, attached as Exhibit 4 to this application.

Exhibit 5 is a list of the interest owners (including any owners of royalty or overriding royalty interests) affected by this application, an example of the letters sent by certified mail providing this application and advising the interest owners that any objections must be filed in writing with the Division within 20 days from the date the Division receives this application, and proof of mailing. Given the nature of the requests in this application, Matador has provided notice, not only the affected persons in the lease/spacing unit to be added, currently approved under Order CTB-827 but also to all affected persons in the other leases/spacing units subject to Order CTB-839. Notice by publication was also be provided to all affected parties.

June 21, 2021

ADMINISTRATIVE CENTRAL TANK BATTERY ORDER

Administrative Order CTB-827
Administrative Application Reference No. pKSC17120657342

August 15, 2017

MATADOR PRODUCTION COMPANY

Attention: Ms. Jordan Kessler

Matador Production Company (OGRID 228937) is hereby authorized to surface commingle oil and gas production from the Purple Sage; Wolfcamp (Gas) Pool (Pool code: 98220) from the following diversely owned fee leases located in Township 24 South, Range 27 East, Eddy County, New Mexico:

Lease: Michael Collins 11 23S 27E RB Well No. 208H Lease; Division Order R-14333
Description: S/2 of Section 11, Township 23 South, Range 27 East, NMPM
Well: Michael Collins 11 23S 27E RB Well No. 208H API 30-015-44082

Lease: Tom Walters 12 23S 27E RB Well No. 203H Lease; Division Order R-13970-A
Description: S/2 of Section 12, Township 23 South, Range 27 East, NMPM
Well: Tom Walters 12 23S 27E RB Well No. 203H API 30-015-43147
Tom Walters 12 23S 27E RB Well No. 208H API 30-015-44197

The combined project area for these wells includes the S/2 of Section 11, and the S/2 of Section 12, both in Township 23 South, Range 27, East, NMPM, Eddy County, New Mexico.

The commingled oil and gas production from the wells detailed above shall be measured and sold at the Tom Walters Central Tank Battery (CTB), located in the Unit H of Section 11, Township 23 South, Range 27 East, NMPM, Eddy County, New Mexico.

Production from the subject wells shall be determined as follows:

The oil and gas production from each of the diversely-owned leases shall be measured with allocation meters. The oil and gas production from each well will flow into a dedicated 3-phase separator. The production stream will be separated into 3 independent streams by the separator and each stream will be measured individually after it exits the separator, before commingling.

Administrative Order CTB-827
Matador Production Company
August 15, 2017

The allocation meters shall be calibrated quarterly in accordance with Rule 19.15.12.10.C (2) NMAC.

Subsequently drilled wells that produce from the subject pool within the project areas approved by this order may be added to this commingling authority by submittal of a Sundry Notice to the Engineering Bureau in Santa Fe.

This installation shall be installed and operated in accordance with the applicable Division Rules. It is the responsibility of the producer to notify the transporter of this commingling authority.

The operator shall notify the Artesia District office of the Division prior to implementation of the commingling operations.

Done at Santa Fe, New Mexico, on August 15, 2017.

¹⁷OPERATOR CERTIFICATION
 I hereby certify that the information contained herein is true and complete to the best of my knowledge and belief, and that this organization either owns a working interest or unleased mineral interest in the land including the proposed bottom hole location or has a right to drill this well at this location pursuant to a contract with an owner of such a mineral or working interest, or to a voluntary pooling agreement or a compulsory pooling order heretofore entered by the division.
 Signature: *Sara Hartsfield* Date: 02/27/18
 Printed Name: Sara Hartsfield
 E-mail Address: shartsfield@matadorresources.com

¹⁸SURVEYOR CERTIFICATION
 I hereby certify that the well location shown on this plat was plotted from field notes of actual surveys made by me or under my supervision, and that the same is true to the best of my belief.
 Date of Survey: 09/28/2017
 Signature and Seal of Professional Surveyor: *Michael Collins*
 Certificate Number: 18329

Re: Application of Matador Production Company for Administrative Approval to Surface Commingle (lease commingle) Production from the Horizontal Spacing Units Comprised of Section 11, Township 23 South, Range 27 East and Section 12, Township 23 South, Range 27 East, NMPM, Eddy County, New Mexico (the “Lands”)

To Whom This May Concern,

Matador Production Company (“Matador”), OGRID: 228937, requests to surface commingle current production from eight (8) wells located on the Lands and future production from the Lands as described herein. Production will be allocated on a daily basis based on the most recent individual well tests of oil, gas, and water. These well tests will last for minimum of 72 hours and they will be conducted at least once per month. Once approved, this application essentially combines existing Administrative Order Nos. CTB-827 and CTB-829 (attached for ease of reference).

Gas exiting each test separator will flow into one gathering line, as depicted on **Exhibit A**, the Longwood Gathering line. Each test separator will have its own orifice meter manufactured and assembled in accordance with American Gas Association (AGA) specifications. All primary and secondary Electronic Flow Measurement (EFM) equipment is tested and calibrated by a reputable third-party measurement company in accordance with industry specifications.

The orifice meter is the preferred measurement device utilized by midstream and E&P companies in natural gas measurement. The gas samples are obtained at the time of the meter testing/calibration and the composition and heating value are determined by a laboratory in accordance with American Petroleum Institute (API) specifications to ensure accurate volume and Energy (MMBTU) determinations. See example from Mitchell Laboratory attached as **Exhibit B** hereto.

The flow stream from each wellhead is demonstrated in the Process Flow Diagram (PFD) attached as **Exhibit A** hereto. It shows that the water, oil, and gas exit the wellbore and flow into a test separator which separates the oil, gas, and water. The oil is measured via turbine meter which is

calibrated periodically in accordance with industry specifications by a third-party measurement company for accuracy. The gas is measured on a volume and MMBTU basis by an orifice meter and supporting EFM equipment in accordance with American Petroleum Association (API) Chapter 21.1. The gas is then sent into a gathering line where it is commingled with each of the other wells' metered gas, as previously described on page one. The gathering line gas is then metered by another orifice meter at the tank battery check to show the total volume of gas leaving the tank battery. This meter is tested and calibrated in accordance with industry specifications and volume and energy are determined on an hourly, daily, and monthly basis. Once the gas exits this final tank battery sales check it travels directly into a third-party sales connect meter. Longwood Gathering has its own orifice meter that measures the gas for custody transfer. These meters are also calibrated periodically to ensure the measurement accuracy.

Very truly yours,

MATADOR PRODUCTION COMPANY

Omar Enriquez
Sr. Production Engineer

CERTIFIED MAIL
RETURN RECEIPT REQUESTED

TO: ALL "AFFECTED PERSONS"

Re: Application of Matador Production Company to amend Administrative Order CTB-839: (1) to add additional leases currently approved under Order CTB-827; (2) to authorize pool and lease commingling, off-lease storage, off lease measurement, and off-lease marketing at the Michael Collins North Tank Battery located in the SE/4 NE/4 (Unit H) of Section 11, Township 23 South, Range 27 East, NMPM, Eddy County, New Mexico for the additional leases; and (3) to allocate production by well test method.

Ladies and Gentlemen:

Enclosed is a copy of the above-referenced application, which was filed with the New Mexico Oil Conservation Division on this date.

Any objection to this application must be filed in writing within twenty days from this date at the Division's Santa Fe office located at 1220 South St. Francis Drive, Santa Fe, New Mexico 87505. If no objection is received within this twenty-day period, this application may be approved administratively by the Division.

If you have any questions about this application, please contact the following:

Brian Fancher
Matador Production Company
940-224-9176
bfancher@matadorresources.com

Sincerely,

A handwritten signature in blue ink, appearing to read "Kaitlyn Luck", written over a horizontal line.

Kaitlyn A. Luck

Application of Matador Production Company to amend Administrative Order CTB-839: (1) to add additional leases currently approved under Order CTB-827; (2) to authorize pool and lease commingling, off-lease storage, off lease measurement, and off-lease marketing at the Michael Collins North Tank Battery located in the SE/4 NE/4 (Unit H) of Section 11, Township 23 South, Range 27 East, NMPM, Eddy County, New Mexico for the additional leases; and (3) to allocate production by well test method. Pursuant to 19.15.12.7 NMAC, Matador seeks to amend the terms of Order CTB-839 to combine production from the following leases and wells currently approved for commingling under Order CTB-839 as wells as under Order CTB-827 at the Michael Collins North Tank Battery:

(a) The 320-acre standard spacing unit comprised of the S/2 of Section 11. The spacing unit is currently dedicated to the Michael Collins 11-23S-27E RB #208H well (API No. 30-015-44082) and the Michael Collins 11-23S-27E RB # 203H well (API No. 30-015-44443). These wells are producing from the Purple-Sage; Wolfcamp (Gas) Pool (98220). The S/2 of Section 11 is a pooled spacing unit, subject to compulsory pooling order R-14333.

(b) The 320-acre standard spacing unit comprised of the S/2 of Section 12. The spacing unit is currently dedicated to the following two horizontal wells: the Tom Walters 12-23S-27E RB #203H well (API No. 30-015-43147), and the Tom Walters 12-23S-27E RB #208H well (30-015-44197). The Tom Walters 12-23S-27E RB #203H well produces from the Purple Sage; Wolfcamp (Gas) Pool (98220); the Tom Walters 12-23S-27E RB #208H well is producing from the Purple Sage; Wolfcamp (Gas) Pool (98220)).

(c) The 320-acre standard spacing unit comprised of the N/2 of Section 11. This spacing unit is currently dedicated to the following horizontal wells: Michael Collins 11-23S-27E RB #201H well (API No. 30-015-44623) and the Michael Collins 11-23S-27E RB #206H well (API No. 30-015-44472). These wells are producing from the Purple Sage; Wolfcamp (Gas) Pool (98220).

(d) The 320-acre standard spacing unit comprised of the N/2 of Section 12. This spacing unit is currently dedicated to the following two horizontal wells: Miss Sue 12-23S-27E RB #201H (API No. 30-015-44622) and the Miss Sue 12-23S-27E RB #202H (API No. 30-015-44433). These wells are producing from the Purple Sage; Wolfcamp (Gas) Pool (98220).

For the each of the wells that Matador seeks to commingle at the Michael Collins North Tank Battery, located in the SW/4 NE/4 (Unit H) of Section 11 and include under the terms of Order CTB-839, Matador intends to meter and store production from this lease at an off-lease location and allocate production to the unit using a well test method.

Any objection to this application must be filed in writing within twenty days from date of publication with the New Mexico Oil Conservation Division, 1220 South St. Francis Drive, Santa Fe, New Mexico, 87505. If no objection is received within this twenty-day period, this application may be approved administratively by the Division. If you have any questions about this application, please contact Brian Fancher, Matador Production Company, (940) 224-9176, or BFancher@matadorresources.com.

Mr. McClure, I'm writing to respond to your questions on this application. Matador owns 100% of the working interest in the S/2 of Section 12, 23S, 27E. Matador's team has also reviewed the stipulations below and has no additional questions regarding compliance at this time. Let us know if you need anything else for this application.

Thanks,

Kaitlyn

Subject: surface commingling application CTB-839-A

External Email

Ms. Luck,

I am reviewing surface commingling application CTB-839-A which involves the Michael Collins North Tank Battery operated by Matador Production Company (228937).

Please confirm that the following tract of land is either pooled or does not need to be pooled:

Fee	S/2	12-23S-27E
-----	-----	------------

OCD allows for allocation to be determined by well test even for diversely owned production, however such testing for unconventional horizontal wells will need to be done as seen below. As these stipulations are more restrictive than those included in the application, new notice will not be required, but please forward these stipulations to the appropriate personal with Matador and confirm whether they have any questions.

Dean McClure

**STATE OF NEW MEXICO
ENERGY, MINERALS AND NATURAL RESOURCES DEPARTMENT
OIL CONSERVATION DIVISION**

**APPLICATION FOR SURFACE COMMINGLING
SUBMITTED BY MATADOR PRODUCTION COMPANY ORDER NO. CTB-839-A**

ORDER

The Director of the New Mexico Oil Conservation Division (“OCD”), having considered the application and the recommendation of the OCD Engineering Bureau, issues the following Order.

FINDINGS OF FACT

1. Matador Production Company (“Applicant”) submitted a complete application to surface commingle the oil and gas production from the pools, leases, and wells identified in Exhibit A (“Application”).
2. Applicant proposed a method to allocate the oil and gas production to the pools, leases, and wells to be commingled.
3. To the extent that ownership is identical, Applicant submitted a certification by a licensed attorney or qualified petroleum landman that the ownership in the pools, leases, and wells to be commingled is identical as defined in 19.15.12.7(B) NMAC.
4. To the extent that ownership is diverse, Applicant provided notice of the Application to all persons owning an interest in the oil and gas production to be commingled, including the owners of royalty and overriding royalty interests, regardless of whether they have a right or option to take their interests in kind, and those persons either submitted a written waiver or did not file an objection to the Application.
5. Applicant provided notice of the Application to the Bureau of Land Management (“BLM”) or New Mexico State Land Office (“NMSLO”), as applicable.
6. Applicant in the notice for the Application stated that it sought authorization to add additional pools, leases, and wells and identified the parameters to make such additions.
7. Applicant stated that it sought authorization to surface commingle and off-lease measure, as applicable, oil and gas production from wells which have not yet been approved to be drilled, but will produce from a pool and lease identified in Exhibit A.

CONCLUSIONS OF LAW

8. OCD has jurisdiction to issue this Order pursuant to the Oil and Gas Act, NMSA 1978, §§ 70-2-6, 70-2-11, 70-2-12, 70-2-16, and 70-2-17, 19.15.12 NMAC, and 19.15.23 NMAC.
9. Applicant satisfied the notice requirements for the Application in accordance with 19.15.12.10(A)(2), (C)(4)(c), and (C)(4)(e) NMAC, as applicable.

10. Applicant satisfied the notice requirements for the Application in accordance with 19.15.23.9(A)(5) and (6) NMAC, as applicable.
11. Applicant's proposed method of allocation, as modified herein, complies with 19.15.12.10(B)(1) or (C)(1) NMAC, as applicable.
12. Commingling of oil and gas production from state, federal, or tribal leases shall not commence until approved by the BLM or NMSLO, as applicable, in accordance with 19.15.12.10(B)(3) and (C)(4)(h) NMAC.
13. Applicant satisfied the notice requirements for the subsequent addition of pools, leases, and wells in the notice for the Application, in accordance with 19.15.12.10(C)(4)(g) NMAC. Subsequent additions of pools, leases, and wells within Applicant's defined parameters, as modified herein, will not, in reasonable probability, reduce the commingled production's value or otherwise adversely affect the interest owners in the production to be added.
14. By granting the Application with the conditions specified below, this Order prevents waste and protects correlative rights, public health, and the environment.

ORDER

1. Applicant is authorized to surface commingle oil and gas production from the pools, leases, and wells identified in Exhibit A.

Applicant is authorized to store and measure oil and gas production off-lease from the pools, leases, and wells identified in Exhibit A at a central tank battery described in Exhibit A.

Applicant is authorized to surface commingle oil and gas production from wells not included in Exhibit A but that produce from a pool and lease identified in Exhibit A.

Applicant is authorized to store and measure oil and gas production off-lease from wells not included in Exhibit A but that produce from a pool and lease identified in Exhibit A at a central tank battery described in Exhibit A.

2. This Order supersedes Orders CTB-827 and CTB-839.
3. The allocation of oil and gas production to wells not included in Exhibit A but that produce from a pool and lease identified in Exhibit A shall be determined in the same manner as to wells identified in Exhibit A that produce from that pool and lease, provided that if more than one allocation method is being used or if there are no wells identified in Exhibit A that produce from the pool and lease, then allocation of oil and gas production to each well not included in Exhibit A shall be determined by OCD prior to commingling production from it with the production from another well.
4. The allocation of oil and gas production shall be based on the production life of each well as measured for three periods: (a) the initial production period shall be measured from the first production until the earlier of either the peak production rate or thirty (30) days after the first production; (b) the plateau period shall be measured from the end of the initial production

period to the peak decline rate; and (c) the decline period shall be measured from the end of the plateau period until the well is plugged and abandoned.

During the initial production period, the oil and gas production for each well identified in Exhibit A shall be allocated using a production curve calculated from a minimum of ten (10) well tests per month, except that any day in which a well test cannot achieve an accurate result due to a temporary change in oil and gas production shall not be included in the computation of time determining the well test schedule. The production curve shall be calculated by interpolating daily production for each day using the known daily production obtained by well tests and shall use a method of interpolation that is at minimum as accurate as maintaining a constant rate of change for each day's production between the known daily production values.

During the plateau period, the oil and gas production for each well identified in Exhibit A shall be allocated using a minimum of three (3) well tests per month.

During the decline period, the oil and gas production for each well identified in Exhibit A shall be allocated as follows: (a) a minimum of three (3) well tests per month when the decline rate is greater than twenty-two percent (22%) per month; (b) a minimum of two (2) well tests per month when the decline rate is between twenty-two percent (22%) and ten percent (10%) per month; and (c) a minimum of one (1) well test per month when the decline rate is less than ten percent (10%) per month.

Upon OCD's request, Applicant shall submit a Form C-103 to the OCD Engineering Bureau that contains the decline rate curve and other relevant information demonstrating the production life of a well.

Applicant shall conduct a well test by separating and metering the oil and gas production from that well for either (a) a minimum of twenty-four (24) consecutive hours; or (b) a combination of nonconsecutive periods that meet the following conditions: (i) each period shall be a minimum of six (6) hours; and (ii) the total duration of the nonconsecutive periods shall be a minimum of eighteen (18) hours.

The well test requirements of this Order shall be suspended for any well shut-in for a period that continues for more than fifteen (15) days until the well commences production.

5. Applicant shall measure and market the commingled oil at a central tank battery described in Exhibit A in accordance with this Order and 19.15.18.15 NMAC or 19.15.23.8 NMAC.
6. Applicant shall measure and market the commingled gas at a central delivery point, central tank battery, or gas title transfer meter described in Exhibit A in accordance with this Order and 19.15.19.9 NMAC, provided however that if the gas is vented or flared, and regardless of the reason or authorization pursuant to 19.15.28.8(B) NMAC for such venting or flaring, Applicant shall measure or estimate the gas in accordance with 19.15.28.8(E) NMAC.
7. Applicant shall calibrate the meters used to measure or allocate oil and gas production in accordance with 19.15.12.10(C)(2) NMAC.

8. If the commingling of oil and gas production from any pool, lease, or well reduces the value of the commingled oil and gas production to less than if it had remained segregated, no later than sixty (60) days after the decrease in value has occurred Applicant shall submit a new surface commingling application to OCD to amend this Order to remove the pool, lease, or well whose oil and gas production caused the decrease in value. If Applicant fails to submit a new application, this Order shall terminate on the following day, and if OCD denies the application, this Order shall terminate on the date of such action.
9. Applicant may submit an application to amend this Order to add pools, leases, and subsequently drilled wells with spacing units adjacent to or within the tracts commingled by this Order by submitting a Form C-107-B in accordance with 19.15.12.10(C)(4)(g) NMAC.
10. If a well is not included in Exhibit A but produces from a pool or lease identified in Exhibit A, then Applicant shall submit Forms C-102 and C-103 to the OCD Engineering Bureau after the well has been approved to be drilled and prior to off-lease measuring or commingling oil or gas production from it with the production from another well. The Form C-103 shall reference this Order and identify the well and proposed method to determine the allocation of oil and gas production to it.
11. Applicant shall not commence commingling oil or gas production from state, federal, or tribal leases until approved by the BLM or NMSLO, as applicable.
12. If OCD determines that Applicant has failed to comply with any provision of this Order, OCD may take any action authorized by the Oil and Gas Act or the New Mexico Administrative Code (NMAC).
13. OCD retains jurisdiction of this matter and reserves the right to modify or revoke this Order as it deems necessary.
