Re: Application of EOG Resources Inc. for administrative approval of an unorthodox well location for its Lakewood 28 Fed Com #749H Well in the W½E½ of Sections 21 and 28, Township 25 South, Range 34 East, N.M.P.M., Lea County, New Mexico.

Dear Ms. Sandoval:

EOG Resources Inc. ("EOG") (OGRID No. 7377) seeks administrative approval of an unorthodox well location for its **Lakewood 28 Fed Com #749 Well** (API No. 30-025-46852)¹ to be completed within the Bobcat Draw; Upper Wolfcamp Pool (Pool Code 98094) underlying the W½E½ of Sections 21 and 28, Township 25 South, Range 34 East, N.M.P.M., Lea County, New Mexico, as follows:

- Surface Hole Location: 200' FSL and 2,143' FEL of Section 28
- Bottom Hole Location: 100' FNL and 2,590' FEL of Section 21
- First Take Point: 100' FSL and 2,590' FEL of Section 28
- Last Take Point: 100' FNL and 2,590' FEL of Section 21

Since this acreage is governed by the Division's statewide rules, the completed interval for the **Lakewood 28 Fed Com #749 Well** is unorthodox because the completed interval is closer than the standard offsets to the eastern boundary of the spacing unit in the E½W½ of Sections 21 and 28. The **Lakewood 28 Fed Com #749 Well** encroaches on the adjoining spacing unit located in the E½W½ of Sections 21 and 28. Approval of the unorthodox completed interval will allow EOG to optimize pressure related to the completion and production drawdown of the wells which

¹ The subject well is currently permitted as the Lakewood 28 Federal Com #707H. On November 22, 2021, EOG filed a sundry (Document No. 2645332) changing the well name and plan as set forth herein.

is expected to yield a higher ultimate recovery than a standard location, thereby preventing waste and protecting correlative rights.

Exhibit A is the Well Location and Acreage Dedication Plat (Form C-102) showing EOG's plans for the completed interval of the **Lakewood 28 Fed Com #749 Well**.

Exhibit B is a land plat for Sections 21 and 28 that shows the proposed **Lakewood 28 Fed Com #749 Well** in relation to the adjoining spacing unit to the west

Exhibit C is a certification from EOG's landman confirming the ownership in Sections 21 and 28.

Exhibit D includes a copy of this application that was sent by certified mail to the affected parties advising that any objections must be filed in writing with the Division within 20 days from the date the Division receives the application, and proof of mailing. Since federal lands are involved, the Bureau of Land Management was provided notice.

Exhibit E is a statement from a EOG's petroleum engineer confirming that EOG's requested unorthodox location is necessary to optimize well spacing, thereby preventing waste and protecting correlative rights.

Sincerely,

Jobediah Rittenhouse

Re: EOG Resources NSL Application
Lakewood 28 Fed Com #749H

To whom it may concern:

A non-standard location is necessary to develop the Wolfcamp formation in these sections efficiently and in an economic manner. Because of other existing Wolfcamp formation wells, a non-standard location optimizes pressures related to the completion and production drawdown of the wells and is expected to yield a higher ultimate recovery than a standard location, thereby preventing waste and protecting correlative rights.
