Re: Application of EOG Resources, Inc. for administrative approval of an unorthodox well location for its Convoy 28 State Com No. 203H well in the E/2E/2 of Sections 28 and 33, Township 24 South, Range 33 East, NMPM, Lea County, New Mexico.

Dear Director Sandoval,

EOG Resources, Inc. (OGRID No. 7377) seeks administrative approval of an unorthodox well location for its **Convoy 28 State Com No. 203H** well (API No. 30-025-50190). This well has not yet been drilled. The spacing unit dedicated to the well is comprised of the E/2E/2 of Sections 28 and 33, Township 24 South, Range 33 East, NMPM, Lea County, New Mexico and is within the Triste Draw; Bone Spring, East Pool (96682). The horizontal spacing unit for the well is approximately 320 acres and does not include proximity wells.

The well will be drilled as follows:

- The surface location is located 468 feet from the North line, 1498 feet from the East line (Unit B) of Section 28,
- The bottom hole location is located 100 feet from the South line, 1260 feet from the East line (Unit P) of Section 33,
- The first take point is located 100 feet from the North line, 1260 feet from the East line (Unit A) of Section 28,
- The last take point is located 100 feet from the South line, 1260 feet from the East line (Unit P) of Section 33.

The acreage is governed by the Division's statewide rules. Accordingly, the proposed completed interval is unorthodox because, as drilled, it is closer than the 330 feet to the western boundary. It encroaches on the spacing units in the W/2E/2 of Section 28 and 33. Approval of the unorthodox

location will allow EOG to use its preferred well spacing plan for horizontal wells, which will prevent waste, and reflects the as-drilled location of the well.

Exhibit A is the Form C-102 filed with the Division, showing the proposed unorthodox completed interval, of the Convoy 28 State Com No. 203H well. The proposed completed interval encroaches on the spacing unit/tracts to the west.

Exhibit B is a plat that shows the Convoy 28 State Com No. 203H well in relation to the adjoining spacing units/tracts to the west.

EOG is the operator of the spacing units to the west, however, ownership is diverse between the subject spacing unit and the affected spacing unit/tracts to the west. **Exhibit C** is a certification from the landman indicating that he has reviewed the tracts affected by this request. Exhibit C includes a list of the affected parties and proof that a copy of this application, along with all attachments, was sent to the affected interest. This notice advises affected parties that any objection must be filed in writing with the Division within 20 days from the date the Division receives the application.

Exhibit D is a statement from a petroleum engineer providing justification for the requested non-standard location.

Thank you for your attention to this matter.

Very truly yours,

To Whom it may concern:

Considering the distance between wells in the development plan for the Bone Spring formation in Sections 28 & 33, T24S-R33E, EOG believes the non-standard location is necessary to develop the Bone Spring resource in an economic fashion.

The non-standard location also reflects the as-drilled location of the well. Based on analog Bone Spring wells along with geologic analysis, EOG believes placing the well at this location maintains optimal spacing to continue development of resources in the formation. Granting the exception will allow for more total production from the section and more efficient development of the asset therefore protecting correlative rights.

Sincerely

EOG Resources, Inc.
