**Re: Affirmation Statement
Veritas 12 State 12 SWD 1**

Dear Mr. Rose-Coss:

I have examined the available geological and engineering data and find no evidence of open faults or any hydrologic connection between the disposal zone and any underground sources of drinking water.

Respectively yours,

Subject: RE: [EXTERNAL] Veritas SWD Order 2370

Fred,

We've gone ahead and looked into the Veritas application again. The UIC team is able to accommodate and address most of Dean's comments in the new permit template and ordering process. However, the application is still lacking the following necessary application material:

- an affirmative statement that the applicant has examined available geologic and engineering data and finds no evidence of open faults or any other hydrologic connection between the disposal zone and any underground sources of drinking water.

Therefore, in order to complete the application and facilitate the issuance of the order, please have a qualified agent perform the review submit the statement.

Thanks,

Dylan Rose-Coss

Phil

Thank you. This makes sense. Laura left the company about then. Several items were left incomplete. I will get the wheels back on. Please forward anything you feel would be helpful. This is on us but we will get the deficiencies closed. Thanks for your response. Fred

RE: Veritas 12 State SWD No.1; SWD-2370; pBL2004139377

Good evening, Fred. Dean conducted an initial review and wrote a very extensive e-mail identifying several deficiencies and/or requesting information. This e-mail was to Ms. Laura Becerra and was dated July 24, 2020. A copy is attached and can also be found in the admin application posting. At this time, I do not see a record of response in any files. Tomorrow, I will ask Dean to search both his personal e-mails for a response and the Engineering e-mail for any submittals. So the application remains administratively incomplete as to content and cannot proceed into technical review. Will update when we know more. PRG

Phil,

The Veritas SWD injection application goes back to July 2020. Can you provide any update on status? We and the Land Office are eager to proceed.
