**APPLICATION FOR OFF-LEASE MEASUREMENT****Martha Creek Battery Trains #2 and #4**

OXY USA WTP LP requests approval of off-lease measurement for wells at the Martha Creek Battery Trains #2 and #4 (J-30-21S-24E). This supersedes PLC 186-0.

*This OLM request includes current and future wells in the CAs/leases and pool listed below.*

**Martha Creek Battery Trains #2 and #4**

Each well will flow to an individual three-phase separator at the battery. The separator is equipped with an orifice meter to measure gas volume, as well as turbine meters to measure oil and water, although the wells does not produce liquid.

The gas meter serves as the BLM FMP meter for the well. Gas flow to sales will be handled through a pending gas commingle permit for the Indian Basin area.

**Additional Application Components:**

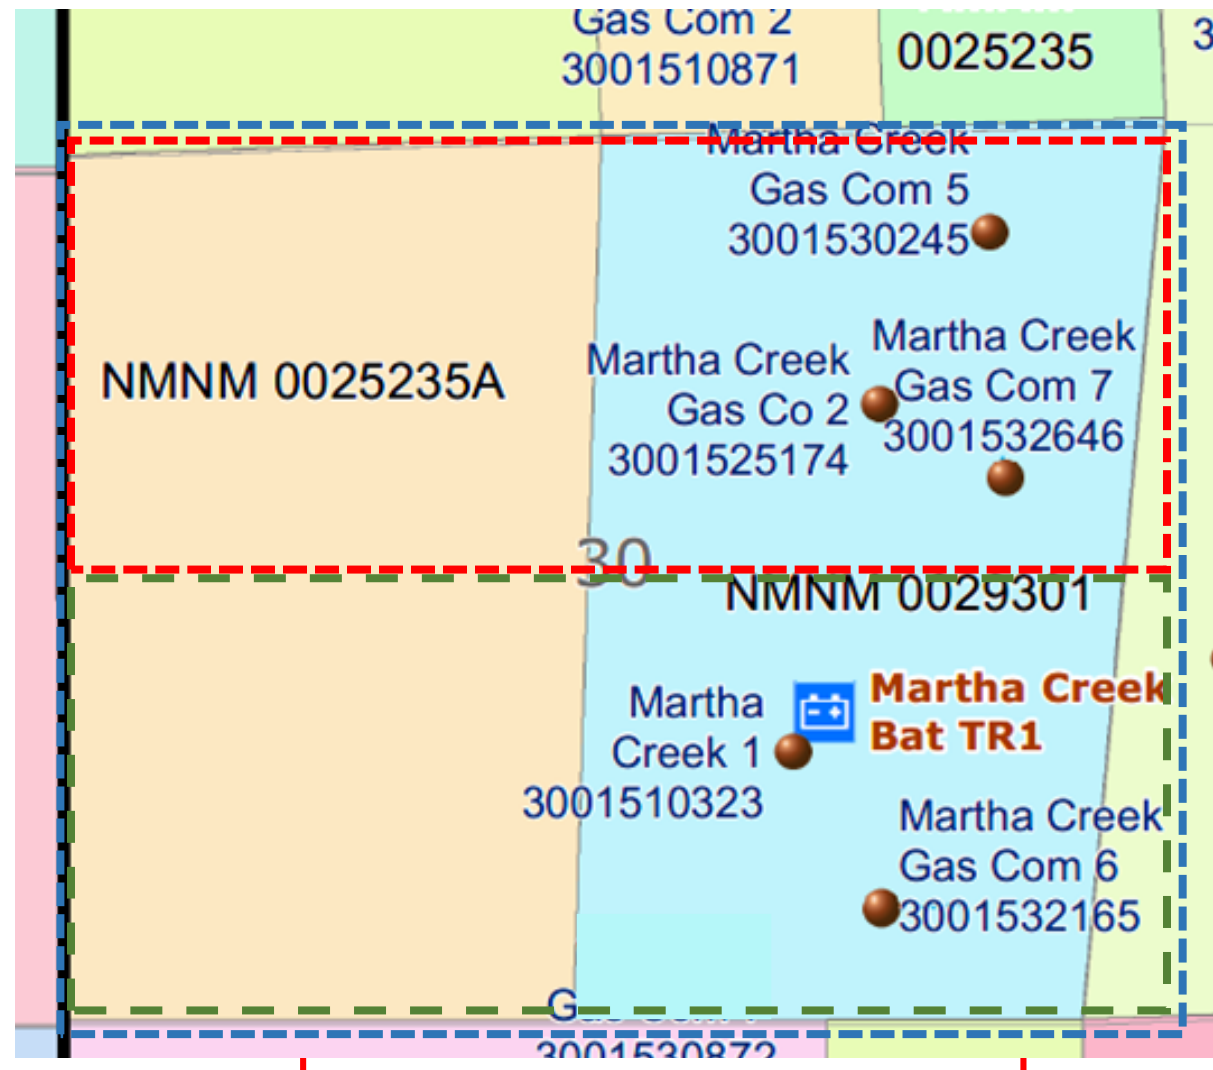

The flow of production is shown in detail on the enclosed facility diagram. Also enclosed is a map detailing facility, lease, and well location.

The oil and gas meters are calibrated on a regular basis per API, BLM and NMOCD specifications.

Pursuant to Statewide rule 19.15.12.10(C)(4)(g) OXY WTP LP requests the option to include additional pools or leases within the defined parameters set forth in the Order for future additions.

Off-lease measurement will not reduce the individual wells' production value or otherwise adversely affect the interest owners. It is the most effective means of producing the reserves.

OXY USA WTP LP understands the requested approval will not constitute the granting of any right-of-way or construction rights not granted by the lease instrument.

Sandra,

It seems as there were several surface commingling applications which Oxy may wish to withdraw related to the Indian Basin area.

Do you happen to have those action IDs and wish to formally withdraw them?
