Re: Application of EOG Resources, Inc. for administrative approval of an unorthodox well location for its Stark 5 Fed Com No. 703H well dedicated to the E/2 of Sections 5 and 8 and W/2 of Sections 4 and 9, Township 26 South, Range 30 East, NMPM, Eddy County, New Mexico.

Dear Director Sandoval,

EOG Resources, Inc. (OGRID No. 7377) seeks administrative approval of an unorthodox well location for its Stark 5 Fed Com No. 703H well (API No. 30-015-48941; sundry approval pending). The spacing unit dedicated to the well is comprised of the E/2 of Sections 5 and 8, and the W/2 of Sections 4 and 9, Township 26 South, Range 30 East, Eddy County, New Mexico and is within the Purple Sage; Wolfcamp pool (98220). The horizontal spacing unit for the well is approximately 1280 acres, which includes proximity tracts. The defining well for the spacing unit is the Stark 33 Fed Com No. 721H well (API No. 30-015-48598; sundry approval pending).

This well has not yet been drilled. It is proposed to be drilled as follows:

- The surface location is located 481 feet from the North line, 693 feet from the East line (Unit A) of Section 5.
- The bottom hole location is located 100 feet from the South line, 1150 feet from the East line (Unit P) of Section 8,
- The first take point is located 330 feet from the North line, 1150 feet from the East line (Unit A) of Section 5,
- The last take point is located 100 feet from the South line, 1150 feet from the East line (Unit P) of Section 8.

The acreage is governed by the Purple Sage; Wolfcamp pool rules set forth in Division Order No. R-14262, which provides for 320-acre spacing units and 330-foot setbacks. Accordingly, the

proposed completed interval is unorthodox because it will be closer than 330 feet to the southern boundary of the spacing unit. It encroaches on the spacing unit in the E/2 of Section 17. Approval of the unorthodox location will allow EOG to use its preferred last take points for horizontal wells in this area, which will maximize recovery and prevent waste. The first take point will remain at an orthodox location for ownership reasons to the north.

Exhibit A is the C-102 sundry pending approval with the BLM. This plat shows the location of the proposed well, including the proposed unorthodox completed interval. The proposed completed interval encroaches on the spacing unit/tracts to the south. The second page of Exhibit A is the approved APD showing the designated pool and API number.

Exhibit B is a plat that shows the Stark 5 Fed Com No. 703H well in relation to the adjoining spacing units/tracts to the south. WPX Energy Permian, LLC is the operator of the spacing unit comprised of the E/2 of Section 17. Accordingly, the parties entitled to notice are the operator of the spacing unit covering the E/2 of Section 17 and the BLM.

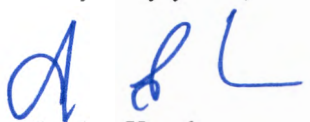

Exhibit C is a certification from the landman indicating that she has reviewed the tracts affected by this request. Exhibit C includes a list of the affected parties and proof that a copy of this application, including exhibits, was mailed to each affected party. This notice advises affected parties that any objection must be filed in writing with the Division within 20 days from the date the Division receives the application.

Exhibit D is a statement from a petroleum engineer providing justification for the requested non-standard location.

Exhibit E is the C-102 for the defining well for the spacing unit, which is the Stark 33 Fed Com No. 721H well (API No. 30-015-48598; sundry approval pending).

Thank you for your attention to this matter.

Very truly yours,

Jordan Kessler

Eddy County, New Mexico

To whom in may concern:

EOG Resources respectfully requests administrative approval of a nonstandard location for each of the Stark wells referenced above. The Stark wells are in the Purple Sage Wolfcamp Gas Pool (Pool Code 98220). As a prudent operator, EOG request that a non-standard location by granted for these wells. By decreasing the last take point from 330' to 100' the effective lateral length of the wells will be increased by 230' for each well, thereby increasing the ultimate recovery from the acreage and reducing resource wastage.

Sincerely,
