Application Number: pMSG2402346206

WFX-1060

FORTY ACRES ENERGY, LLC [371416]

Initial Application Part I

Received: 4/4/2022

This application is placed in file for record. It MAY or MAY NOT have been reviewed to be determined Administratively Complete

FORM C-108
Revised June 10, 2003

APPLICATION FOR AUTHORIZATION TO INJECT

- I. PURPOSE: X Secondary Recovery Pressure Maintenance Disposal Storage
Application qualifies for administrative approval? Yes X No
- II. OPERATOR: FORTY ACRES ENERGY, LLC
ADDRESS: 11757 Katy Freeway, Suite 725, Houston, TX 77079
CONTACT PARTY: Jessica LaMarro PHONE: (832) 706 0049
- III. WELL DATA: Complete the data required on the reverse side of this form for each well proposed for injection.
Additional sheets may be attached if necessary.
- IV. Is this an expansion of an existing project? X Yes No
If yes, give the Division order number authorizing the project: R-14616
- V. Attach a map that identifies all wells and leases within two miles of any proposed injection well with a one-half mile radius circle drawn around each proposed injection well. This circle identifies the well's area of review.
- VI. Attach a tabulation of data on all wells of public record within the area of review which penetrate the proposed injection zone. Such data shall include a description of each well's type, construction, date drilled, location, depth, record of completion, and a schematic of any plugged well illustrating all plugging detail.
- VII. Attach data on the proposed operation, including:
1. Proposed average and maximum daily rate and volume of fluids to be injected;
 2. Whether the system is open or closed;
 3. Proposed average and maximum injection pressure;
 4. Sources and an appropriate analysis of injection fluid and compatibility with the receiving formation if other than reinjected produced water; and,
 5. If injection is for disposal purposes into a zone not productive of oil or gas at or within one mile of the proposed well, attach a chemical analysis of the disposal zone formation water (may be measured or inferred from existing literature, studies, nearby wells, etc.).
- *VIII. Attach appropriate geologic data on the injection zone including appropriate lithologic detail, geologic name, thickness, and depth. Give the geologic name, and depth to bottom of all underground sources of drinking water (aquifers containing waters with total dissolved solids concentrations of 10,000 mg/l or less) overlying the proposed injection zone as well as any such sources known to be immediately underlying the injection interval.
- IX. Describe the proposed stimulation program, if any.
- *X. Attach appropriate logging and test data on the well. (If well logs have been filed with the Division, they need not be resubmitted).
- *XI. Attach a chemical analysis of fresh water from two or more fresh water wells (if available and producing) within one mile of any injection or disposal well showing location of wells and dates samples were taken.
- XII. Applicants for disposal wells must make an affirmative statement that they have examined available geologic and engineering data and find no evidence of open faults or any other hydrologic connection between the disposal zone and any underground sources of drinking water.
- XIII. Applicants must complete the "Proof of Notice" section on the reverse side of this form.
- XIV. Certification: I hereby certify that the information submitted with this application is true and correct to the best of my knowledge and belief.
NAME: Jessica LaMarro TITLE: Geologist
SIGNATURE:  DATE: 3/31/2022
E-MAIL ADDRESS: Jessica@faenergyus.com
- * If the information required under Sections VI, VIII, X, and XI above has been previously submitted, it need not be resubmitted. Please show the date and circumstances of the earlier submittal:

DISTRIBUTION: Original and one copy to Santa Fe with one copy to the appropriate District Office

Side 2

III. WELL DATA

A. The following well data must be submitted for each injection well covered by this application. The data must be both in tabular and schematic form and shall include:

- (1) Lease name; Well No.; Location by Section, Township and Range; and footage location within the section.
- (2) Each casing string used with its size, setting depth, sacks of cement used, hole size, top of cement, and how such top was determined.
- (3) A description of the tubing to be used including its size, lining material, and setting depth.
- (4) The name, model, and setting depth of the packer used or a description of any other seal system or assembly used.

Division District Offices have supplies of Well Data Sheets which may be used or which may be used as models for this purpose. Applicants for several identical wells may submit a "typical data sheet" rather than submitting the data for each well.

B. The following must be submitted for each injection well covered by this application. All items must be addressed for the initial well. Responses for additional wells need be shown only when different. Information shown on schematics need not be repeated.

- (1) The name of the injection formation and, if applicable, the field or pool name.
- (2) The injection interval and whether it is perforated or open-hole.
- (3) State if the well was drilled for injection or, if not, the original purpose of the well.
- (4) Give the depths of any other perforated intervals and detail on the sacks of cement or bridge plugs used to seal off such perforations.
- (5) Give the depth to and the name of the next higher and next lower oil or gas zone in the area of the well, if any.

XIV. PROOF OF NOTICE

All applicants must furnish proof that a copy of the application has been furnished, by certified or registered mail, to the owner of the surface of the land on which the well is to be located and to each leasehold operator within one-half mile of the well location.

Where an application is subject to administrative approval, a proof of publication must be submitted. Such proof shall consist of a copy of the legal advertisement which was published in the county in which the well is located. The contents of such advertisement must include:

- (1) The name, address, phone number, and contact party for the applicant;
- (2) The intended purpose of the injection well; with the exact location of single wells or the Section, Township, and Range location of multiple wells;
- (3) The formation name and depth with expected maximum injection rates and pressures; and,
- (4) A notation that interested parties must file objections or requests for hearing with the Oil Conservation Division, 1220 South St. Francis Dr., Santa Fe, New Mexico 87505, within 15 days.

NO ACTION WILL BE TAKEN ON THE APPLICATION UNTIL PROPER PROOF OF NOTICE HAS BEEN SUBMITTED.

NOTICE: Surface owners or offset operators must file any objections or requests for hearing of administrative applications within 15 days from the date this application was mailed to them.

Part V.

V.

Exhibit A1 shows 21 unique well locations within a ½ mile radius of the proposed new drill injector location, and 247 unique well locations within a 2 mile radius.

West Eumont Unit 118

Exhibit A2 shows 19 unique well locations within a ½ mile radius of the proposed new drill injector location, and 265 unique well locations within a 2 mile radius.

V.

West Eumont Unit 122

Exhibit A4 shows 21 unique well locations within a ½ mile radius of the proposed new drill injector location, and 248 unique well locations within a 2 mile radius.

[illegible]

Exhibit A5 shows 22 unique well locations within a ½ mile radius of the proposed new drill injector location, and 201 unique well locations within a 2 mile radius.

[illegible]

Part VI.

Following Exhibits, B1-B5, are the tabulation of the wells with each well's type, construction, date drilled, location, depth, and completion date of wells within a ½ mile radius that are displayed in Exhibits A1-A5. The plugged well wellbore diagrams are displayed in Exhibits C1-C9.

Installed dry hole marker.

VII. Proposed Injection Operation

1. Average injection rate target will be ~550 bpd. Maximum injection rate will be 1,000 bpd. These numbers are based off of typical injection rates in nearby Yates-Seven Rivers-Queen water floods.
2. The system will be a closed system. The injection well will not be made available for commercial disposal purposes.
3. Average injection pressure will be ~760 psi. Maximum injection pressure will be calculated relative to the depth of the highest perforation, using a factor of 0.2 psi/ft. The proposed injector will have perforation depths of approximately 3,800' (or 760 psi maximum injection pressure). Pending results of a step rate test, the maximum injection pressure could potentially be increased to a factor of 0.5 psi/ft (or 1900 psi at 3,800').
4. The water source will be produced water from a combination of the Rice SWD system and several potential unit wells if additional supply is needed. The source water will be predominately Grayburg and San Andres formation water which will be treated with 35-50 ppm scale inhibitor.
5. Injection will be into the Yates-Seven Rivers-Queen formation, which is immediately productive in the area.

VIII. Geologic Data

The proposed waterflood will be injecting into the Yates-Seven Rivers-Queen reservoir. The portion that will be injected consists mainly of sandstones interbedded with dolomites and anhydrites. The reservoir quality rocks have porosities ranging from 10% to 20% and averages around 16%.

Formation Tops Are:

Formation	Offset Top (STATE WE "B" 4) 30-025-03381	Contents
Alluvium	GL	Fresh Water
Rustler	1403	Anhydrite
Salado (top of salt)	1581	Salt
Tansil (base of salt)	2795	Gas, Oil, & Water
Yates	2968	Gas, Oil, & Water
Seven Rivers	3300	Gas, Oil, & Water
Queen	3713	Gas, Oil, & Water
<i>Y-SR-Q Injection Interval</i>	<i>3000-4000</i>	<i>Gas, Oil, & Water</i>
Total Depth	3870	
<i>Grayburg</i>	<i>~4150</i>	<i>Gas, Oil, & Water</i>

IX. Proposed Stimulation Program

The new drill injector will be acidized with 3,000 gal 15% HCl for each set of perforations. Acid in the Yates-Seven Rivers-Queen formation is known to break down the perfs and cause injection at lower pressures vs perforating alone. The new drill injectors will not be sand frac'd so there will be better vertical conformance.

X. Logging and Test Data for Wells

These will be new drill injectors.

XI. Chemical Analysis of Fresh Water Wells

According to records from the Office of the State Engineer (**Exhibit D-1 through D-5**) there is 1 ACTIVE water wells within the 1 mile radius around the proposed WEST EUMONT UNIT #118, 1 ACTIVE within 1 mile radius of location WEST EUMONT UNIT #119, 1 ACTIVE within a 1 mile radius of location WEST EUMONT UNIT #122, and 1 ACTIVE, 1 possibly ACTIVE, and 1 INACTIVE wells within a 1 mile radius of location WEST EUMONT UNIT #123. There is 1 possibly ACTIVE well and 1 INACTIVE well within the 1 mile radius of the WEST EUMONT #223. There are no ACTIVE water wells within the ½ mile radius of these locations. So, no existing underground drinking water sources are above or below the Yates-Seven Rivers-Queen reservoir within a mile radius.

Forty Acres Energy has obtained water analyses on 2 fresh water wells. The closest water well, the CP-00602, is between 0.6 and 1.42 miles away from each location, 300' (md) deep, and considered a "shallow" water supply. The second well, the CP-00587, is between 2.3 and 2.6 miles away from each location, 250' (md) deep, and considered a "shallow" water supply. See **Exhibits E1, E2, and E3**.

Exhibit E4 is an example water analysis of the waters being injected into the current WEST EUMONT UNIT injectors.

XII. Based on the available geologic and engineering data, it has been determined that there is no evidence of open faults or any other hydrologic connection between the injection zone and shallow fresh water sources.

XIII. Forty Acres Energy, LLC & CITATION OIL & GAS CORP are the only offset operators.
Surface Owners: State- Merchant Livestock Co & Cooper Family Trust

		xSAT	mg/L	xSAT	mg/L	xSAT	mg/L	xSAT	mg/L	xSAT	mg/L	xSAT	mg/L	xSAT	mg/L		

Saturation Levels (xSAT) are the ratio of ion activity to solubility, e.g. {Ca}{CO₃}/K_{sp}. pCO₂ (atm) is the partial pressure of CO₂ in the gas phase.
 mg/L scale is the quantity of precipitation (or dissolution) required to instantaneously bring the water to equilibrium.

Affidavit of Publication

STATE OF NEW MEXICO
COUNTY OF LEA

I, Daniel Russell, Publisher of the Hobbs News-Sun, a newspaper published at Hobbs, New Mexico, solemnly swear that the clipping attached hereto was published in the regular and entire issue of said newspaper, and not a supplement thereof for a period of 1 issue(s).

Beginning with the issue dated
March 13, 2022
and ending with the issue dated
March 13, 2022.

Publisher

Sworn and subscribed to before me this
13th day of March 2022.

Business Manager

My commission expires
January 29, 2023
(Seal)

This newspaper is duly qualified to publish legal notices or advertisements within the meaning of Section 3, Chapter 167, Laws of 1937 and payment of fees for said

Forty Acres, Energy, LLC announces its intent to apply to the New Mexico Oil Conservation Division (NMOCD) for an Authorization to inject for each of the injection wells in the table below. The coordinate system for the locations in the table is WGS 84.

Well Name	Proposed Injection Zone	Legal Description	Township	Range	Section	Latitude	Longitude
West Eumont Unit 118	YatesSeven RiversQueen	2450 FNL 10 FWL	21S	35E	1	32.5156140	-103.3297320
West Eumont Unit 119	YatesSeven RiversQueen	2450 FNL 1295 FWL	21S	35E	1	32.5156140	-103.3255620
West Eumont Unit 122	YatesSeven RiversQueen	1527 FNL 1466 FWL	21S	35E	1	32.5181510	-103.3250050
West Eumont Unit 123	YatesSeven RiversQueen	1170 FNL 10 FWL	21S	35E	1	32.5191310	-103.3297260
West Eumont Unit 223	YatesSeven RiversQueen	1500 FNL 1450 FWL	21S	35E	2	32.5181360	-103.3421370

Each of the wells in the table are part of the West Eumont Unit Waterflood, unitized in the Yates/Seven Rivers/Queen formations at approximately 3,800' total vertical depth. Maximum injection pressure and rates will be 760psi and 1000 bpd per injector. For questions or comments about this application, contact the operator at Forty Acres Energy, LLC Attn.: Huxley Song, 11757 Katy Freeway, Suite 725, Houston, TX 77079. Phone 832-706-0057. Objections or requests for hearing with the Oil Conservation Division, 1220 South St. Francis Drive, Santa Fe, NM 87505, within 15 days.

Question		NO APPARENT RISK	CLEAR RISK	WEST EUMONT UNIT 118, 119, 122, 123, & 223
<i>Background Seismicity</i>				
1	Are large earthquakes ($M \geq 5.5$) known in the region (within 200 miles)?	NO	YES	NO
2	Are earthquakes known near the injection site (within 10 miles)	NO	YES	NO
3	Is rate of activity near the injection site (within 10 miles) high?	NO	YES	NO
<i>Local Geology</i>				
4	Are faults mapped within 10 miles of the site?	NO	YES	YES
5	If so, are these faults known to be active?	NO	YES	NO
6	Is the site near (within 200 miles of) tectonically active features?	NO	YES	NO
<i>State of Stress</i>				
7	Do stress measurements in the region suggest rock is close to failure?	NO	YES	NO
<i>Injection Practices</i>				
8	Are (proposed) injection practices sufficient for failure?	NO	YES	NO
9	If injection has been ongoing at the site, is injection correlated with the occurrence of earthquakes?	NO	YES	NO
10	Are nearby injection wells associated with earthquakes?	NO	YES	NO
TOTAL "YES" ANSWERS		0	10	1
