Sections 9, T-26-S, R-33-E, NMPPM
Lea County, New Mexico

Dear Mr. Lowe:

Pursuant to Division Rule 19.15.16.15(B)(5), Mewbourne Oil Company ("Mewbourne") respectfully requests administrative approval of a non-standard proration unit for its proposed Salado Draw 9 wells listed above. These wells will be drilled as horizontal oil wells in the Bradley Bone Spring (Oil) Pool (7280). The current spacing units are 160 acre units, made up of 40 acre building blocks for the pool rules. Mewbourne is seeking an expanded 320 acre unit.

The Salado Draw 9 Fed Com #561H and #563H will be dedicated to a standard 320-acre oil spacing and proration unit comprising all of Section 9. There are currently no other existing Bone Spring Oil wells producing from within the proposed spacing unit.

The non-standard proration unit is necessary in order to maximize the recovery of oil and gas reserves from the Bone Spring formation underlying all of Section 9.

The affected offset acreage comprises the SE/4SE/4 of Section 5, NE/4NE/4 of Section 17, S/2SW/4 & SW/4SE/4 of Section 4, N/2NW/4 & NW/4NE/4 of Section 16, E/2E/2 of Section 8, and the W/2W/2 of Section 9 all in T26S-R33E, Lea County, New Mexico. There is currently Bone Spring production within the offset acreage. Consequently, notice of this application is being provided to all parties listed on the attached list of affected parties.

Attached are the Form C-102s showing the surface, first take point, and bottomhole locations for the Salado Draw 9 Fed Com #561H and #563H. Also, attached is a map showing the affected offset acreage, a horizontal well plan, notice list and offset notice letter.

Mewbourne is seeking approval of this NSP to eliminate the need for separate production facilities and additional administrative approvals. Therefore, reducing waste while protecting correlative rights within the referenced horizontal spacing unit.

Notice by certified mail, return receipt requested, has been given to the affected parties listed in the notification list attached.

Thank you for your consideration of this application. Should you have any questions regarding the above, please email me at janderson@mewbourne.com or call me at (432) 682-3715.

Sincerely,

MEWBOURNE OIL COMPANY

A handwritten signature in blue ink, appearing to read "Josh Anderson", with a long horizontal flourish extending to the right.

Salado Draw 9 Fed Com #563H
API No. 30-015-Pending
Surface Location: 345 FNL & 1440 FWL (Unit C) (Sec. 9)
Proposed First Perf: 100 FNL & 1760 FWL (Unit N) (Sec. 9)
Bottomhole Location: 100 FSL & 1760 FWL (Unit N) (Sec. 9)
Proposed Last Perf: 100 FSL & 1760 FWL (Unit N) (Sec. 9)

To Whom It May Concern:

Enclosed is a copy of Mewbourne Oil Company's (MOC) Application for Non-Standard Proration Unit for the Salado Draw 9 Fed Com #561H and #563H wells in Section 9, T-26-S, R-33-E, Lea County, New Mexico. You are being sent a copy of this Application per OCD's requirements to notify the interest owners in the affected offset acreage. If you have any objection to this Application, notification should be given within 20 days of the date of this letter. The Application has been filed with the OCD as of this date.

MOC is seeking approval of the non-standard proration unit to eliminate the need for separate production facilities and additional administrative approvals. Therefore, reducing waste while protecting correlative rights with the referenced horizontal spacing unit.

If you have any questions regarding this application, please contact me via telephone at 432-682-3715 or via email at janderson@mewbourne.com.

Sincerely,

MEWBOURNE OIL COMPANY

Josh Anderson, RPL

ACREAGE DEDICATION PLATS

This grid represents a standard section. You may superimpose a non-standard section, or larger area, over this grid. Operators must outline the dedicated acreage in a red box, clearly show the well surface location and bottom hole location, if it is a directionally drilled, with the dimensions from the section lines in the cardinal directions. If this is a horizontal wellbore show on this plat the location of the First Take Point and Last Take Point, and the point within the Completed interval (other than the First Take Point or Last Take Point) that is closest to any outer boundary of the tract.

Surveyors shall use the latest United States government survey or dependent resurvey. Well locations will be in reference to the New Mexico Principal Meridian. If the land is not surveyed, contact the OCD Engineering Bureau. Independent subdivision surveys will not be acceptable.
