Paula Vance,

I finally got to settle down from this morning's onslaught of meetings and conversations. All were informative and constructive.

Upon further thinking of the one portion of the well of interest below. I will cancel the NSL request for the portion of the well that is encroaching to the INTERIOR portion of the James Ranch Unit. I will continue with the latter portion of Perf zone well's pool/formation.

**Re: XTO Permian Operating, LLC
Request for Administrative Approval of Unorthodox Well Location**

James Ranch Unit Apache #111H well
N/2 N/2 of Sections 13 and 14, Township 22 South, Range 30 East,
Eddy County, New Mexico
Los Medanos; Wolfcamp [96921]
API No. 30-015-PENDING

Dear Mr. Razatos:

XTO Permian Operating, LLC (OGRID No. 373075), pursuant to Division Rules 19.15.16.15(C)(6) and 19.15.15.13 NMAC and applicable rules governing acreage and well location requirements for the Los Medanos; Wolfcamp [96921] and Los Medanos; Wolfcamp (Gas) [96597], seeks administrative approval of an unorthodox well location for its **James Ranch Unit Apache #111H well** (API No. 30-015-PENDING), in a 320-acre, more or less, spacing unit underlying the N/2 N/2 of Sections 13 and 14, Township 22 South, Range 30 East, Eddy County, New Mexico. This application is specific for the Los Medanos; Wolfcamp [96921].

The proposed location for the **James Ranch Unit Apache #111H** is as follows:

- Surface location: 2,576' FSL and 867' FEL (Unit I) of Section 13
- First take point: 544' FNL and 330' FEL (Unit A) of Section 13
- Last take point: 544' FNL and 100' FWL (Unit D) of Section 14
- Bottom hole location: 544' FNL and 50' FWL (Unit D) of Section 14

Since this acreage is governed by the Division's statewide rules, the completed lateral for this well will be unorthodox because it is closer than the standard offsets along a portion of the northern

boundary—thus encroaching on the S/2 of Section 11, and N/2 SW/4 of Section 12, Township 22 South, Range 30 East.

XTO Permian Operating, LLC respectfully requests administrative approval of a non-standard location for the **James Ranch Unit Apache #111H well**. Due to the current spacing of the producing wells in this section, XTO Permian Operating, LLC has planned the James Ranch Unit Apache #111H with at least 660 feet of spacing between each Wolfcamp well. This spacing pattern causes the James Ranch Unit Apache #111H to be drilled less than 660 feet along portions of the north boundary of the Unit. XTO Permian Operating, LLC requests approval of this non-standard location because it is necessary to avoid causing wasted resources and reducing the production of the wells to be drilled within the James Ranch Unit.

Exhibit A is a Form C-102 showing the proposed James Ranch Unit Apache #111H well encroaches on the spacing unit/tracts to the north in Sections 11 and 12, Township 22 South, Range 30 East.

Exhibit B is a plat that shows the proposed James Ranch Unit Apache #111H well in relation to the adjoining spacing unit/tracts to the north. The affected spacing unit/tracts to the north are owned by ConocoPhillips Company. In addition, the exhibit identifies that the tracts include Bureau of Land Management (“BLM”) leases. Accordingly, the “affected persons”¹ ConocoPhillips Company and BLM.

Exhibit C is a spreadsheet listing all affected persons and includes tracking information demonstrating that each of the affected persons was sent a copy of this application with all attachments by certified mail advising that any objections must be filed in writing with the Division within 20 days from the date the Division receives the application. The following are the affected persons:

Type	Affected Party	Location
Mineral Interest	Bureau of Land Management	S/2 Section 11 & N/2 SW/4 Section 12, T22S-R30E
Working Interest	ConocoPhillips Company	S/2 Section 11, T22S-R30E

¹ See NMAC §§ 19.15.2.7.A(8) [defining “affected persons” as, “in the absence of an operator, or with respect to an application wherein the operator of the spacing unit or identified tract is the applicant, each working interest owner”] and 19.15.4.12.A(2)(a).

Your attention to this matter is appreciated.

Sincerely,

Paula M. Vance

This grid represents a standard section. You may superimpose a non-standard section, or larger area, over this grid. Operators must outline the dedicated acreage in a red box, clearly show the well surface location and bottom hole location, if it is a directionally drilled, with the dimensions from the section lines in the cardinal directions. If this is a horizontal wellbore show on this plat the location of the First Take Point and Last Take Point, and the point within the Completed interval (other then the First Take Point and Last Take Point) that is closest to any outer boundary of the tract.

Surveyor shall use the latest United States government survey or dependent resurvey. Well locations will be in reference to the New Mexico Principal Meridian. If the land is not surveyed, contact the OCD Engineering Bureau. Independent subdivision surveys will not be acceptable.
