You have requested to drill this horizontal well at an unorthodox well location described above in the referenced pool or formation. 19.15.16.15(B)(1)(a) NMAC governs this proposed well and provides that the operator shall dedicate to each horizontal **oil** well a standard horizontal spacing unit that comprises of one or more contiguous tracts that the horizontal well's completed interval penetrates, each of which consists of a governmental quarter - quarter section or equivalent. 19.15.16.15(C)(1)(a) NMAC governs the distance in the horizontal plane from any point in the completed interval to any outer boundary of the horizontal spacing unit, measured along a line perpendicular to the completed interval or to the tangent thereof, shall be a minimum of 330 feet for an **oil** well. 19.15.16.15(C)(1)(b) NMAC governs the first and last take point of a horizontal

well shall be no closer than 100 feet in the horizontal plane, to any outer boundary of the horizontal spacing unit.

The request to deviate from an orthodox location has met all requirements of 19.15.16.15 (C)(5)(a) NMAC. It is understood that you are seeking this exception in order to create a non-standard location, comprised of Take Points referenced above, within the described Horizontal Spacing Unit.

This well's completed interval is as close as 25 feet to the southern edge of the horizontal spacing unit. Encroachment will impact the following tracts.

Section 04, encroachment to the NW/4 SW/4

The Division understands you have given notice of this application to all operators or owners who are "affected persons," as defined in 19.15.2.7(A)(8) NMAC, in all adjoining units towards which the proposed location encroaches.

The Division understands you are seeking this unorthodox location to avoid causing wasted resources, and to reduce production from current and future well development within the Bone Spring formation underlying the NW/4 of Section 04, T22S, R33E and W/2 of Section 33, T21S, R33E, thereby protecting the correlative rights and the disposition of wastes resulting from oil and gas operations.

Your application has been filed under 19.15.16.15(C)(6) NMAC, 19.15.15.13 NMAC and 19.15.4.12 (A)(2) NMAC.

Per 19.15.15.13 (B) NMAC, Division approves this unorthodox location.

Reference this NSL order number on the As Drilled C-102 submitted with the Authorization to Transport, to place this well into production.

The above approvals are subject to your following all other applicable Division rules.

Jurisdiction of this case is retained for the entry of further orders as the Division deems necessary.

## Re: Chevron U.S.A., Inc. Request for Administrative Approval of Unorthodox Well Location

DL 4 33 Fed Com #402H well Lot 3-4 and S/2 NW/4 of Section 4, Township 22 South, Range 33 East, and W/2 of Section 33, Township 21 South, Range 33 East, NMPM, Lea County, New Mexico Red Tank; Bone Spring, East [51687] API No. 30-025-52276

Dear Mr. Razatos:

Chevron U.S.A., Inc. ("Chevron") (OGRID No. 4323), pursuant to Division Rules 19.15.16.15(C)(6) and 19.15.15.13 NMAC and applicable rules governing acreage and well location requirements for the Red Tank; Bone Spring, East [51687], seeks administrative approval of an unorthodox well location for its **DL 4 33 Fed Com #402H** well (API No. 30-025-52276), in a 480-acre, more or less, spacing unit underlying the Lot 3-4 and S/2 NW/4 of Section 4, Township 22 South, Range 33 East, and W/2 of Section 33, Township 21 South, Range 33 East, NMPM, Lea County, New Mexico.

The location for the DL 4 33 Fed Com #402H oil well is as follows:

- Surface hole location: 2,538' FNL and 1,713' FWL (Unit F) of Section 4
- First take point: 2,615' FNL and 1,210' FWL (Unit E) of Section 4
- Last take point: 100' FNL and 1,210' FWL (Unit D) of Section 33
- Bottom hole location: 25' FNL and 1,210' FWL (Unit D) of Section 33

Since this acreage is governed by the Division's statewide rules, the proposed first take point for this well will be unorthodox because it is closer than the standard offsets to the southern boundary of the spacing unit—thus, encroaching on the spacing unit comprising the SW/4 of Section 4 and W/2 of Section 9, Township 22 South, Range 33 East (Chevron's Dagger Lake 4 9 Federal spacing unit) to the south.

Chevron respectfully requests administrative approval of a non-standard location for the proposed **DL 4 33 Fed Com #402H** well. Chevron requests approval of this non-standard location because it is necessary to avoid causing wasted resources and reducing production from current and future well development in the area.

**Exhibit A** is a Form C-102 showing the **DL 4 33 Fed Com #402H** well encroaches on the DL 4 9 Federal spacing unit to the south.

**Exhibit B** is a plat for the surrounding area that shows the proposed DL 4 33 Fed Com #402H well in relation to the adjoining unit to the south. The offsetting <u>DL 4 9 Federal spacing</u> <u>unit to the south</u> is operated by Chevron, and Chevron is the only working interest in the spacing unit. In addition, the offsetting DL 4 9 Federal spacing unit includes a Bureau of Land Management (BLM) lease. Accordingly, the only "affected person"<sup>1</sup> is the BLM.

**Exhibit C** is a spreadsheet listing all affected persons and includes tracking information demonstrating that each of the affected persons requiring notice was sent a copy of this application with all attachments by certified mail advising that any objections must be filed in writing with the Division within 20 days from the date the Division receives the application. The following are the affected persons Chevron provided notice:

Туре	Affected Party	Location
Federal Mineral Interest	Bureau of Land Management	SW/4 of Section 4 and W/2 of Section 9, T22S-R33E

Your attention to this matter is appreciated.
