13. Describe proposed or completed operations. (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work). SEE RULE 19.15.7.14 NMAC. For Multiple Completions: Attach wellbore diagram of proposed completion or recompletion.

OXY USA INC. requests approval to add the following wells to PLC 844F at Lost Tank 25 Central Processing Facility (CPF) (K-25-T22S-R31E) within the gas commingle for facilities in the Lost Tank Area. These wells will be included in the currently approved pool of LIVINGSTON RIDGE;BONE SPRING (39350) and the currently approved Bone Spring PA NMNM106725931 within PLC 844F. Allocation is by well test as stipulated by PLC 929A, which is the commingle Order for the Lost Tank 25 CPF. The C-102 forms are attached.

The facilities described in PLC 844F are unchanged – each facility has a sales-quality orifice meter (BLM gas FMP or equivalent meter) that continuously measures gas volume before it leaves the facility. Any commingling of wells upstream of these meters has been approved according to the Commingle Orders for each individual facility, with allocated to each well based on well test. For facilities where all wells are within the same pool and lease, so a commingle permit for the individual facility is not required, the facility's aforementioned meter is dedicated to a single pool and lease.

This request is for gas production only. Oil production commingling is handled through an amendment to PLC 929A.
