Importance: High

Jaclyn M. McLean,

I will need to cancel and reject these NSL applications at this time. Permian Resources Operating, LLC was lacking public notice at the take point(s).

These applications have been an obstacle to maneuver within the status of review for all other NSL applications pending.

Permian Resources Operating, LLC can resubmit these applications once all concerns of public notice are addressed.

What about the Taipan wells? They are in the same lack of Public Notice scenario as the Ocotillo wells.

Subject: NSL - Taipan 21 Federal Com Well No. 204H - Public Notice - Gas Pool

Importance: High

J.M.

Action ID NO. 454443

The subject Well's NSL application shows that notice was not properly done.

The Pool (BURTON FLAT; WOLFCAMP, NORTH (GAS) [73520]) for this NSL has the following specifics, S.B. = 660 feet (perpendicular to the well bore) & 330 feet (within the linear plane), Spacing = 320 acres (Building Blocks = 160 acres)

Public notice for HSU Pool requirements of 320 acres shall provide public notice to the encroaching tracts of 160 acres.

The application appears to show a lack of complete public notice.

Can you verify if all the encroaching tracts have been properly noticed?

19.15.4.12 NOTICE REQUIREMENTS FOR SPECIFIC ADJUDICATIONS:

(2) Unorthodox well locations.

(a) If the proposed well location is unorthodox by being located closer to the spacing unit's outer boundary than 19.15.15 NMAC, 19.15.16 NMAC or applicable special pool orders

permit, the applicant shall notify the affected persons in each adjoining spacing unit in the same pool or formation located closer to the unorthodox well location than the minimum distance prescribed by the applicable rule or order. If an adjoining tract is not included in a spacing unit in the same pool or formation in which the well may be completed, then for such tract the applicant shall notify affected persons in the same pool or formation in any adjoining quarter-quarter section (if the proposed well will be completed in a pool where the standard spacing unit is 40 acres), or any adjoining quarter section (if the proposed well will be completed in a pool where the standard spacing unit is greater than 40 acres), that is located closer to the unorthodox well location than the minimum setback distance prescribed by the applicable rule or order.

QTR SECTION = 160 acres.

Gerasimos Razatos Acting Division Director Oil Conservation Division Energy, Minerals and Natural Resources Department 1220 South Saint Francis Drive Santa Fe, New Mexico 87505

Re: Permian Resources Operating, LLC
Request for Administrative Approval of Unorthodox Well Location

Taipan 21 Fed Com 203H N/2 S/2 of Sections 21 and 22, Township 20 South, Range 28 East, Eddy County, New Mexico Burton Flat, Wolfcamp, North (Gas) Pool (Code 73520)

Dear Mr. Razatos,

In accordance with Division Rules 19.15.16.15(C)(6) and 19.15.15.13 NMAC, Permian Resources Operating, LLC ("Permian Resources") (OGRID No. 372165) seeks administrative approval of an unorthodox well location for the Taipan 21 Fed Com 203H well, in a 320 acre, more or less, non-standard horizontal spacing unit, comprised of the N/2 S/2 of Sections 21 and 22, Township 20 South, Range 28 East, Eddy County, New Mexico.

The location for the **Taipan 21 Fed Com 203H** well is as follows:

- Surface Hole Location: 1,438' FSL and 356' FEL, Section 20, Township 20 South, Range 28 East
- <u>First Take Point</u>: 2,310' FSL and 100' FWL, Section 21, Township 20 South, Range 28 East
- <u>Last Take Point</u>: 2,310' FSL and 100' FEL, Section 22, Township 20 South, Range 28 East
- Bottom Hole Location: 2,310' FSL and 10' FEL, Section 22, Township 20 South, Range 28 East

Writer:

Jaclyn M. McLean Managing Partner jmclean@hardymclean.com

125 Lincoln Avenue, Suite 223 Santa Fe, NM 87501 505-230-4410

HardyMclean.com

Hardy McLean LLC April 22, 2025 Page 2

The completed interval of the well will be unorthodox because it is located less than 330' from the southern boundary of the existing 320-acre horizontal spacing unit. As explained in the engineering statement, included as **Exhibit A**, approval of the unorthodox, completed interval is necessary to allow Permian Resources to reduce stranded resources, accelerate recovery time, and improve overall productivity of the wells. This will prevent waste and protect correlative rights.

Exhibit B is a Form C-102 showing the location of the Taipan 21 Fed Com 203H well in relation to the offset tracts.

Exhibit C is a plat for Sections 21 and 22 of Township 20 South, Range 28 East, that shows the Taipan 21 Fed Com 203H well in relation to the adjoining tracts/proposed spacing units. Permian Resources is the offset operator of all adjoining tracts and spacing units.

Exhibit D is a list that identifies all affected persons who were sent a copy of this application and attachments by certified mail advising that any objections must be filed in writing with the Division within 20 days from the date the Division receives the application, along with the date notice was sent, and a copy of the notice letter to affected persons.

Thank you for your attention to this matter. Please let me know if you require additional information.

Very truly yours,

HARDY MCLEAN LLC

/s/ Jaclyn M. McLean

Re: Taipan 21 Fed Com #203H

SHL: 1,438' FSL, 356' FEL of Section 20, T20S-R28E **FTP:** 2,310' FSL, 100' FWL of Section 21, T20S-R28E **LTP:** 2,310' FSL, 100' FEL of Section 22, T20S-R28E **BHL:** 2,310' FSL, 10' FEL of Section 22, T20S-R28E

Eddy County, New Mexico

To Whom It May Concern,

To minimize unnecessary burden, prevent waste, and protect correlative rights, Permian respectfully requests approval of this non-standard location to allow the completed interval to be less than 330 feet from the northern boundary of the existing 320-acre horizontal spacing unit. Approval of this request will allow adherence to standard wellbore clearance factors from an existing saltwater disposal wellbore.

Approval of a non-standard location will maximize the wellbore's contact to undeveloped resource in this unit, reducing stranded resources, accelerating recovery time, and improving overall productivity. The request for a non-standard location is therefore in the best interests of the mineral owners as well as the operator.

Approval of the unorthodox, completed interval is necessary to allow Permian to maximize lateral length, properly place stimulation energy, and optimize pressure drawdown, which will create cost efficiencies, prevent waste, and protect correlative rights.

Sincerely,

Sam Hamilton

Reservoir Engineer

Permian Resources Operating, LLC

ACREAGE DEDICATION PLATS

This grid represents a standard section. You may superimpose a non-standard section, or larger area, over this grid. Operators must outline the dedicated acreage in a red box, clearly show the well surface location and bottom hole location, if it is directionally drilled, with the dimensions from the section lines in the cardinal directions. If this is a horizontal wellbore show on this plat the location of the First Take Point and Last Take Point, and the point within the Completed interval (other than the First Take Point or Last Take Point) that is closest to any outer boundary of the tract.

Surveyors shall use the latest United States government survey or dependent resurvey. Well locations will be in reference to the New Mexico Principal Meridian. If the land is not surveyed, contact the OCD Engineering Bureau. Independent subdivision surveys will not be acceptable.

Re: Permian Resources Operating, LLC

Requests for Administrative Approval of Unorthodox Well Locations

Enclosed are copies of administrative applications requesting approval of unorthodox well locations for Permian Resources Operating, LLC's ("Permian Resources") Taipan 21 Fed Com 201H, Taipan 21 Fed Com 202H, Taipan 21 Fed Com 203H, and Taipan 21 Fed Com 204H wells. Administrative applications for the unorthodox well locations were filed with the New Mexico Oil Conservation Division on this date. Any objection to these applications must be filed in writing within twenty (20) days from the date this application is received by the New Mexico Oil Conservation Division, 1220 South St. Francis Drive, Santa Fe, New Mexico 87505. If no objection is received within this twenty-day period, these applications may be approved administratively by the Division.

If you have any questions about this application, please contact Ryan Curry, Senior Landman at Permian Resources – Ryan.Curry@permianres.com.

Sincerely,

HARDY MCLEAN LLC
