Dear Mr. Razatos:

Tap Rock Operating (OGRID No. 372043) ("Tap Rock"), pursuant to 19.15.23.9 NMAC, seeks administrative approval to permit oil and gas production from one lease (Federal Lease No. NMNM91507) to be transported prior to measurement to another lease for storage at the **Highlife Fed Com Centralized Tank Batter** ("Highlife CTB"). The oil and gas production are from the same common source of supply, commingling will not result from off-lease measurement, and there will be no intercommunication of the handling, separating, treating, or storage facilities designated to each lease.

Off-lease measurement, storage, and sales will occur at the Highlife CTB from the following wells (the "Wells"):

Oil and gas production the Lands underlying the Wells will be measured, stored, and sold at the Highlife CTB located in Section 10, Township 25 South, Range 25 East to minimize surface disturbance and excess emissions created by multiple facilities. The Wells will be metered through individual liquid coriolis flow meters for oil, and orifice meters for gas. Gas exiting each well test flows into one gathering line. Each well on the Lands will have its own test separator with a coriolis flow meter for oil and orifice meter for gas manufactured and assembled in accordance with the American Gas Association ("AGA") specifications.

All primary and secondary Electronic Flow Measurement ("EFM") equipment is tested and calibrated in accordance with industry specifications. Gas samples are obtained at the time of the meter testing and calibration, and the composition and heating value are determined by a laboratory in accordance with the American Petroleum Institute ("API") specifications to ensure accurate volume and energy (MMBTU) determinations.

pads, the CTB facility location pad in the subject area, and gathering line. The plat also identifies wellbores and lease/spacing unit boundaries. A BLM serial register page for NMNM091507 is also included.

Exhibit 2 is a completed Application for Off-Lease Measurement Form C-107B, that includes a statement from Josh Woods, Sr Production Engineer, with Tap Rock, identifying the facilities and the measurement devices to be utilized, a detailed schematic of the surface facilities (Attachment A to the statement), and an example gas analysis (Attachment B to statement).

Exhibit 3 is a C-102 for each of the wells currently permitted or drilled within the existing spacing units.

Ownership is common between the described spacing unit Lands and Wells. **Exhibit 4** is a list of interest owners (including any owners of royalty or overriding royalty interests) affected by this application, an example of the letters sent by certified mail advising the interest that any objections must be filed in writing with the Division within 20 days from the date the Division receives this application, and proof of mailing. A copy of this application has been provided to the Bureau of Land Management ("BLM") since federal lands are involved.

Thank you for your time and attention to this matter. Please let me know if you require additional information.

Very truly yours,

Re: Application of Tap Rock Operating, LLC for administrative approval for approval for off lease measurement of oil and gas production from the spacing unit comprised in Section 10 Township 25S, Range 25E Eddy County, New Mexico (the "Lands")

To Whom This May Concern,

Tap Rock Operating, LLC ("Tap Rock"), OGRID No. 372043, requests off lease measurement for oil and gas production from four (4) wells in addition to any future wells to be added. The off-lease measurement location will be in Section 10, Township 25S, Range 25E Eddy County, New Mexico (location plat attached). The wells will be metered through individual liquid coriolis flow meters for oil and orifice meters for gas. Gas exiting each well test flows into one gathering line, as depicted on **Exhibit A**, the gas gathering line. Each well on the Lands will have its own test separator with a coriolis flow meter for oil and orifice meter for gas manufactured and assembled in accordance with the American Gas Association (AGA) specifications. All primary and secondary Electronic Flow Measurement (EFM) equipment is tested and calibrated by a reputable third-party measurement company in accordance with industry specifications.

Gas samples are obtained at the time of the meter testing and calibration and the composition and heating value are determined by a laboratory in accordance with the American Petroleum Institute (API) specifications to ensure accurate volume and energy (MMBTU) determinations.

The oil is measured via the coriolis flow meter in accordance with API Chapter 5.6 on each individual well and is calibrated periodically by a third-party measurement company for accuracy. After the oil is individually metered by coriolis flow meters at each well it can be comingled into a heater treater then into the stock tanks or, each well can be isolated into its own individual tank for testing purposes. The gas is measured on a volume and MMBTU basis by an orifice meter on each individual well and supporting EFM equipment in accordance with API Chapter 21.1. The gathering line is then metered by another orifice meter at the tank battery check meter to show the total volume of gas leaving the tank battery. The tank battery meter is tested and calibrated in accordance with industry specifications and volume and energy and determined on an hourly, daily and monthly basis. Once the gas exits the final tank battery sales check it travels directly into a third-party sales connect meter. The third-party gas gatherer has its own meter that measures the gas for custody transfer and that meter is also calibrated periodically to ensure measurement accuracy.

Exhibit 1

In conclusion, all the oil and gas produced on the Lands is and will be metered separately at each wellhead and allocated using accurate measurement equipment according to API specifications.

TAP ROCK OPERATING, LLC

Tap Rock Operating, LLC

New Mexico Department of Energy, Minerals and Natural Resource
 1220 South Saint Francis Drive
 Santa Fe, New Mexico 87505

Re: Application of Tap Rock Operating for administrative approval of off-lease measurement from a spacing unit underlying Sections 11 and 12, Township 25 South, Range 25 East and Section 7, Township 25 South, Range 26 East, NMPM, Eddy County, New Mexico (the "Lands") to the Highlife Fed Com CTB facility located in Section 10, Township 25 South, Range 25 East.

To Whom This May Concern,

Pursuant to this application, Tap Rock seeks authority to perform off-lease measurement from the spacing unit underlying Sections 11 and 12, Township 25 South, Range 25 East and Section 7, Township 25 South, Range 26 East, NMPM, Eddy County, New Mexico (the "Lands") to the Highlife Fed Com CTB facility located in Section 10, Township 25 South, Range 25 East, as set forth herein.

Specifically, Tap Rock requests approval to perform off-lease measurement, storage, and sales from the following four wells:

Well Name	Well Number	US Well Number	Lease Number
HIGH LIFE	211H	3001554530	NMNM91507
HIGH LIFE	202H	3001554526	NMNM91507
HIGH LIFE	204H	3001554529	NMNM91507
HIGH LIFE	213H	3001554531	NMNM91507

Oil and gas production the Lands underlying the Wells will be measured, stored, and sold at the Highlife CTB located in Section 10, Township 25 South, Range 25 East to minimize surface disturbance and excess emissions created by multiple facilities. The Wells will be metered through individual liquid coriolis flow meters for oil, and orifice meters for gas. The flow lines and stream from each well is demonstrated in the Process Flow Diagram ("PFD") attached as **Exhibit A** hereto. This PFD shows the water, oil, and gas exit the wellbore and flow into three-phase separator located at the Highlife CTB which separates the oil, gas, and water.

Gas exiting each well flows into one gathering line owned by Tap Rock's third party midstream company, Targa, after measurement as depicted on **Exhibit A**. Each well on the Lands will have its own test separator with a coriolis flow meter for oil and orifice meter for gas manufactured and assembled in accordance with the American Gas Association ("AGA") specifications. The production from the Lands and Wells will not be commingled with production from other leases prior to measurement.

BEATTY & WOZNIAK, P.C.

All primary and secondary Electronic Flow Measurement (“EFM”) equipment is tested and calibrated in accordance with industry specifications. Gas samples are obtained at the time of the meter testing and calibration, and the composition and heating value are determined by a laboratory in accordance with the American Petroleum Institute (“API”) specifications to ensure accurate volume and energy (MMBTU) determinations. A gas sample is provided in the application as **Exhibit B**.

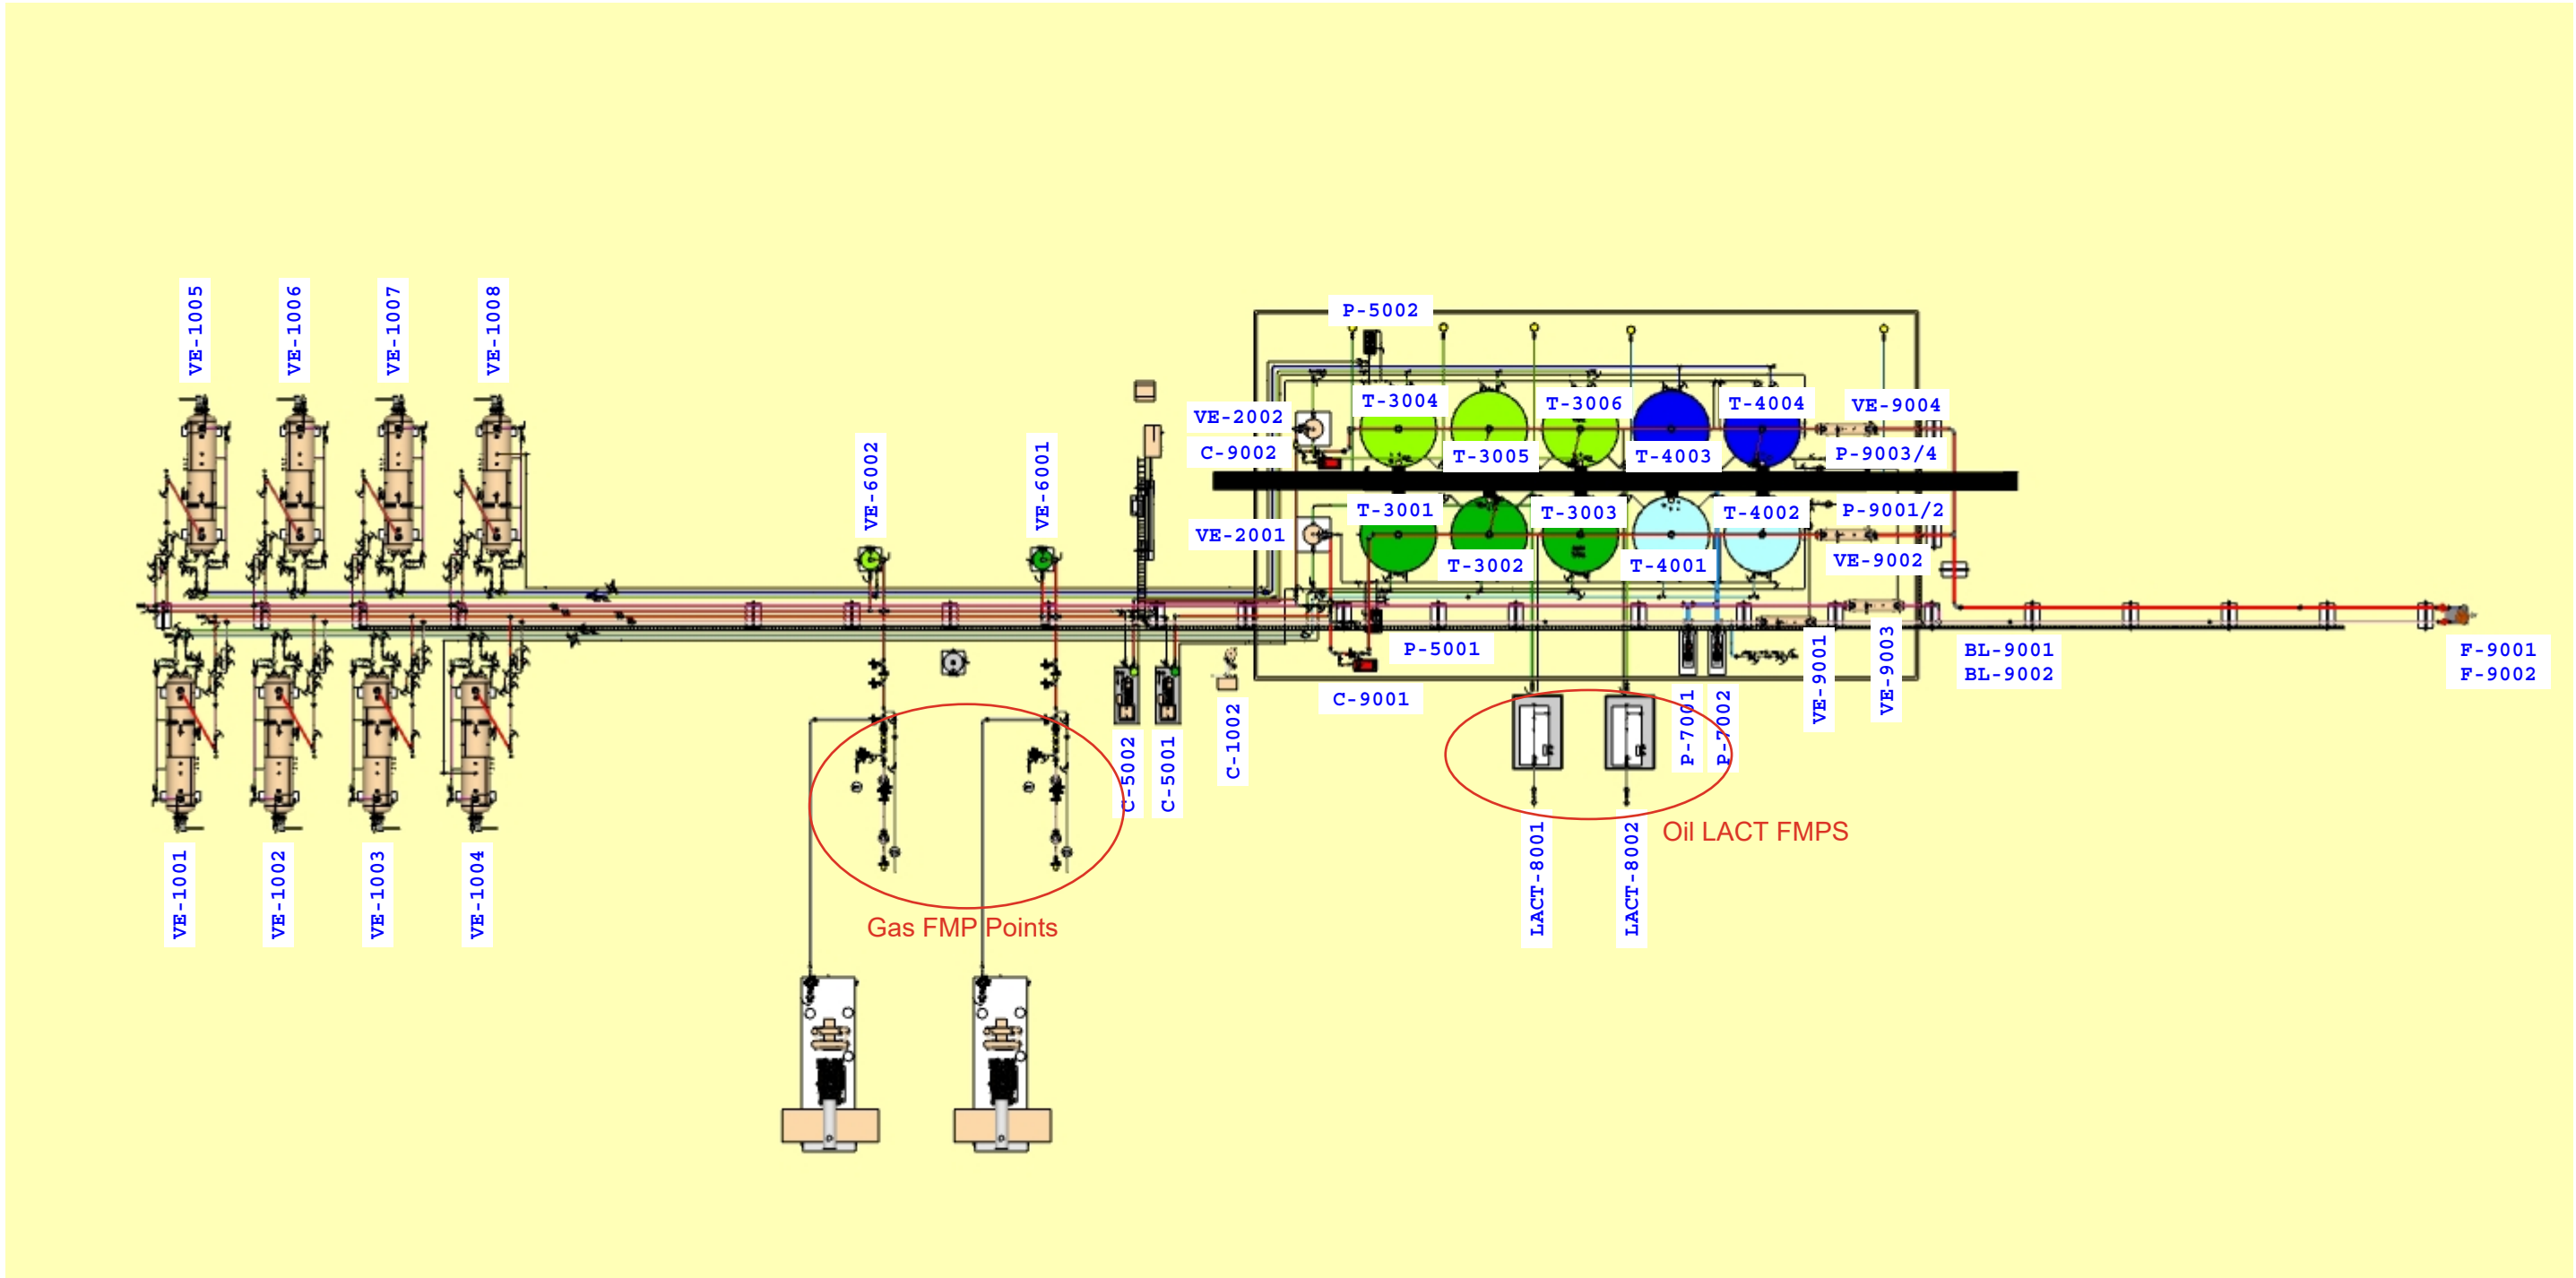

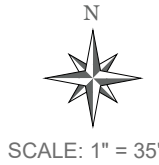

In sum, all the oil and gas produced on the Lands is and will be metered at the Highlife CTB prior to sales, will not be commingled, and will be allocated accurately using measurement specifications accepted by API as industry standard.

To: [Jacob Everhart](#)
Subject: RE: [EXTERNAL] RE: Action ID 460239 OLM-304
Date: Tuesday, July 8, 2025 7:50:35 AM

CAUTION: EXTERNAL SOURCE

It looks like the information that was sent out was showing the larger acreage for that one well. If that is the case, then no new notification will be needed. However, don't file another application until the change of plans is approved as we are starting to reject anything that has open applications that effect the surface commingling application. So the answer to your below question is yes, C-103A with an updated C-102. Also, include this email saying that no new notification is required as I will surely forget all of this by tomorrow.

Oh, and for future reference, the lease maps on this application were a little confusing for me. Don't necessarily need the wells shown but a border and legend showing the lease(s) would help and maybe use a darker color for any wording on the map itself. In this case yellow was used and I had a heck of a time trying to read it, as I am apparently blind and it was like camouflage. LOL

Sarah,

Ok, understood. So, if im reading your notes correctly below, a C-103A submission with a note on the increased size in HSU with an updated C-102 should suffice, correct?
