ADMINISTRATIVE NON-STANDARD LOCATION

Administrative Order NSL – 9336

**XTO Permian Operating, LLC [OGRID 373075]
James Ranch Unit DI 1A S Well No. 115H
API No. 30-015-PENDING**

Reference is made to your application received on April 20th, 2026.

Proposed Location

	Footages	Unit/Lot	Sec.	Twsp	Range	County
Surface	1514 FNL & 2234 FWL	F	21	22S	30E	Eddy
First Take Point	660 FNL & 2500 FWL	C	28	22S	30E	Eddy
Last Take Point	660 FNL & 100 FWL	D/1	30	22S	30E	Eddy
Terminus	660 FNL & 50 FWL	D/1	30	22S	30E	Eddy

Proposed Horizontal Units

Description	Acres	Pool	Pool Code
NW/4 Section 28	799.70	Los Medanos; Wolfcamp (GAS)	96597
N/2 Section 29			
N/2 (equivalent) Section 30			

You have requested to drill this horizontal well at an unorthodox well location described above in the referenced pool or formation. 19.15.16.15(B)(3)(a) NMAC governs this proposed well and provides that the operator shall dedicate to each horizontal gas well a standard horizontal spacing unit that comprises of one or more contiguous tracts that the horizontal well's completed interval penetrates, each of which consists of a governmental quarter section or equivalent.

Administrative Order NSL - 9336
XTO Permian Operating, LLC
Page 2 of 2

19.15.16.15(C)(1)(a) NMAC governs the distance in the horizontal plane from any point in the completed interval to any outer boundary of the horizontal spacing unit, measured along a line perpendicular to the completed interval or to the tangent thereof, shall be a minimum of 660 feet for a **gas** well. 19.15.16.15(C)(1)(b) NMAC governs the first and last take point of a horizontal well shall be no closer than 330 feet for a **gas** in the horizontal plane, to any outer boundary of the horizontal spacing unit.

The request to deviate from an orthodox location has met all requirements of 19.15.16.15 (C)(5)(a) NMAC. It is understood that you are seeking this exception in order to create a non-standard location, comprised of First and Last Take Points referenced above within the described Horizontal Spacing Unit.

This well's completed interval is as close as 100 feet to the western edge of the horizontal spacing unit. The unorthodox location is exterior to the James Rance Unit. Encroachment will impact the following tracts:

Section 25, T22S, R29E encroachment to the NE/4

The Division understands you have given notice of this application to all operators or owners who are "affected persons," as defined in 19.15.2.7(A)(8) NMAC, in all adjoining units towards which the proposed location encroaches.

Division understands you are seeking this unorthodox location as your preferred well spacing plan for horizontal well and to maximize the productive lateral within the Wolfcamp formation underlying NW/4 Section 28, N/2 Section 29 and N/2 (equivalent) Section 30. While protecting the correlative rights of all affected parties and preventing waste.

Your application has been filed under 19.15.16.15(C)(6) NMAC, 19.15.15.13 NMAC and 19.15.4.12 (A)(2) NMAC.

Per 19.15.15.13 (B) NMAC, **Division approves this unorthodox location.**

Reference this NSL order number on the As Drilled C-102 submitted with the Authorization to Transport, to place this well into production.

The above approvals are subject to your following all other applicable Division rules.

Jurisdiction of this case is retained for the entry of further orders as Division deems necessary.

Albert C.S. Chang
Division Director

RE: Application of XTO Permian Operating, LLC, for Administrative Approval of Unorthodox Well Location (NSL)

James Ranch Federal Unit D1 1A S 115H (API No. 30-015-*Pending*)
SHL – 1,514 FNL, 2,234 FWL, Unit F, Section 21, T22S, R30E
BHL – 660 FNL, 50 FWL, Lot 1, Section 30, T22S, R30E
FTP – 660 FNL, 2,500 FWL, Unit C, Section 28, T22S, R30E
LTP – 660 FNL, 100 FWL, Lot 1, Section 30, T22S, R30E
Los Medanos; Wolfcamp [Pool Code: 96597]
Eddy County, New Mexico

Dear Mr. Chang,

XTO Permian Operating, LLC (“XTO”), (OGRID No. 373075), pursuant to Division rules 19.15.16.15(C)(6), 19.15.15.13, and 19.15.4.12(A)(2) NMAC, seeks administrative approval of an unorthodox well location (“NSL”) for its **James Ranch Federal Unit D1 1A S 115H** well (the “115H Well”).

Reason for the Request: The 115H Well will be completed in the Los Medanos; Wolfcamp pool [Pool Code: 96597] which adheres to statewide rules for spacing and setbacks. As such, the completed interval(s) must be located 660 feet from the exterior boundary of the applicable spacing unit. Additionally, the first and last take point must not be closer than 330 feet, in the horizontal plane, to any outer boundary of the horizontal spacing unit. Here, the FTP and LTP is located

closer than 330 feet to the outer boundary of the spacing unit. So, an NSL approval is warranted.

The horizontal spacing unit is 799.70-acres and is comprised of the N/2 of Sections 29 and 30, and the NW/4 of Section 28, Township 22 South, Range 30 East, N.M.P.M., Eddy County, NM. The spacing unit is located within the James Ranch Federal Unit. XTO is the unit operator of the federal unit. As you are aware, NM OCD and BLM policy only allows for federal unit operators to drill and operate wells within the boundaries of federal exploratory units. So, XTO is best positioned to drill and operate the 115H well in question, even if unorthodox due to the setbacks.

Approval of the unorthodox location will allow XTO to use its preferred well spacing plan for horizontal wells and to maximize the productive laterals, which will prevent waste and protect correlative rights.

Notice is provided under 19.15.15.13(C) and 19.15.4.12.A.(2)(a) NMAC to affected persons *in each adjoining spacing unit in the same pool or formation located closer to the unorthodox well location than the minimum distance prescribed by the applicable rule or order.*

The acreage included in the NSL will be subject to the following leases:

- NMNM0006811
- NMNM0006810A
- NMNM0006809A

In addition to the reasons stated above, XTO seeks administrative approval of an NSL to develop the acreage as a single development area and to maximize the productive lateral. Doing so allows XTO to efficiently locate surface facilities, such as well pad locations and centralized tank batteries, reduce disturbance impacts, reduce emissions and leak points, consolidate roadways, reduce traffic, consolidate pipeline(s), and promotes effective well spacing, thereby ensuring the promotion of conservation, the prevention of waste, and the protection of correlative rights. Division rules 19.15.16.7.P and 19.15.16.15.B(8) NMAC encourage oil and gas development, where possible, in enlarged areas of common ownership to minimize surface disturbance and to promote efficient well spacing. Further, Division rule 19.15.16.15.C.(6) NMAC authorizes administrative approval of such a request.

Please find the below listed Exhibits included in this application:

Exhibit 1 is a statement from XTO Commercial & Land Advisor, Andrea Smith Bosworth, CPL.

Exhibit 2 is the Well Location and Acreage Dedication Plat (C-102) for the well within the proposed NSL application and includes the SHL, FTP, LTP, and BHL.

Exhibit 3 includes: (1) a lease map showing the proposed Non-Standard Location and the adjoining tracts identifying the notification area, and (2) a map showing the entirety of the the James Ranch Federal Unit, and the wells approximate location in relation to the federal unit.

Exhibit 4 includes a list of affected persons under 19.15.15.13(B) and 19.15.4.12.A.(2)(a) who were sent a copy of this application, proof of publication, and attachments by certified mail advising that any objections must be filed in writing with the Division within 20 days from the date the Division receives the application.

Thank you for your time and attention to this matter. Please let me know if you require additional information.

Very truly yours,

BEATTY & WOZNIAK, P.C.

Landman Statement

I have reviewed the ownership of the oil and gas leasehold in the proposed 799.20-acre, more or less, Non-Standard Horizontal Spacing Unit ("NSHSU") underlying the N/2 of Sections 29 and 30, and the NW/4 of Section 28, T22S, R30E, N.M.P.M. Eddy County, NM, for purposes of the administrative NSL approval for XTO's **JRU DI 1A S 115H well**. As of the date of this letter, the affected parties are:

See Attached EXHIBIT "4"

XTO is seeking approval of the non-standard well location to eliminate the need for separate production facilities and additional administrative approvals. Approval of the NSL will allow for efficient surface facility placement, reduced surface disturbance, and the consolidation of roads, storage tanks, and pipelines. These measures support effective well spacing, conservation of the resource, enhanced recoveries and economics, and waste prevention, while also helping to minimize environmental impacts such as emissions from multiple tank batteries and associated facilities. The Oil Conservation Division's rules encourage such developments to maximize efficiency and reduce surface disturbance in areas of common ownership.

Sincerely,

XTO Permian Operating, LLC.

ACREAGE DEDICATION PLATS

This grid represents a standard section. You may superimpose a non-standard section, or a larger area, over this grid. Operators must outline the dedicated acreage in a red box, clearly show the well surface location and bottom hole location, if it is directionally drilled, with the dimensions from the section lines in the cardinal directions. If this is a horizontal wellbore show on this plat the location of the First Take Point and Last Take Point, and the point within the Completed interval (other than the First Take Point or Last Take Point) that is the closest to any outer boundary of the tract.

Surveyors shall use the latest United States government survey or dependent resurvey. Well locations will be in reference to the New Mexico Principal Meridian. If the land is not surveyed, contact the OCD Engineering Bureau. Independent subdivision surveys will not be acceptable.

Los Medanos; Wolfcamp [Pool Code: 96597]
Eddy County, New Mexico

To Whom It May Concern,

Enclosed is a copy of the above-referenced application filed with the New Mexico Oil Conservation Division (the “Division”) on this date. Any objections that you have to these applications must be filed in writing with the New Mexico Oil Conservation Division, 1220 South St. Francis Drive, Santa Fe, New Mexico, 87505, within twenty (20) days from the date the Division receives the above-referenced applications. If no objection is received within the twenty-day period, the application may be approved administratively by the Division.

This Application would have been filed with, and received by, the Division either on the date of this letter as referenced above, or no later than two (2) days after the date referenced above. Email correspondence for this matter can be sent to the Division at OCD.Engineer@emnrn.nm.gov. If you have any questions about this application, please contact the following:

Andrea Smith Bosworth, CPL, Commercial & Land Advisor – Delaware Basin NM
ExxonMobil
