**STATE OF NEW MEXICO
DEPARTMENT OF ENERGY, MINERALS AND NATURAL RESOURCES
OIL CONSERVATION DIVISION**

**APPLICATION OF STRATA PRODUCTION CO.
FOR COMPULSORY POOLING,
EDDY COUNTY, NEW MEXICO**

Case No. 24131

APPLICATION

Strata Production Company, OGRID No. 21712 (“Strata”), through its undersigned counsel Montgomery & Andrews, P.A. (Sharon T. Shaheen and Samantha H. Catalano), hereby files this application with the Oil Conservation Division pursuant to the provisions of NMSA 1978, § 70-2-17, for an order pooling all mineral interests in the Delaware formation (FORTY NINER RIDGE; DELAWARE [24750]) in a standard 320-acre, more or less, horizontal spacing and proration unit (“HSU”) comprised of the N/2 S/2 of Sections 27 and 28, Township 23 South, Range 30 East in Eddy County, New Mexico. In support of its application, Strata states as follows:

1. Strata is a working interest owner in the proposed HSU and has the right to drill thereon.
2. Strata proposes to drill the following 2-mile well in the proposed HSU: **Eeyore 27 28 ILL Fed Com 3H** well, to be horizontally drilled from an approximate surface hole location 1720’ FSL and 330’ FEL of Section 27, T23S-R30E, to an approximate bottom hole location 1720’ FSL and 100’ FWL of Section 28, T23S-R30E (“Well”).
3. The first and last take points for the proposed well will meet the setback requirements set forth in the statewide rules for horizontal oil wells. The completed lateral for the Well complies with the standard setbacks.

4. Strata has in good faith sought and been unable to obtain voluntary agreement for the development of these lands from all of the mineral interest owners in the HSU.

5. Approval of the HSU and the pooling of all mineral interest owners in the Delaware formation underlying the HSU will avoid the drilling of unnecessary wells, prevent waste, and protect correlative rights.

6. In order to permit Strata to obtain its just and fair share of the oil and gas underlying the subject lands, all uncommitted interests in this HSU should be pooled and Strata should be designated the operator of the HSU.

WHEREFORE, Strata requests that this application be set for hearing before an examiner of the Oil Conservation Division on February 1, 2024, and that, after notice and hearing as required by law, the Division enter an order:

A. Creating a standard 320-acre, more or less, HSU comprised of the N/2 S/2 of Sections 27 and 28, Township 23 South, Range 30 East in Eddy County, New Mexico;

B. Pooling all mineral interests in the Delaware formation underlying the HSU;

C. Allowing the drilling of the following 2-mile well in the proposed HSU: **Eeyore 27 28 ILL Fed Com 3H;**

D. Designating Strata as operator of the HSU and the well to be drilled thereon;

E. Authorizing Strata to recover its costs of drilling, equipping and completing the well;

F. Approving the operating charges and costs of supervision while drilling of \$8,000/month and, after completion, \$800/month, together with a provision adjusting the rates pursuant to the COPAS accounting procedures; and

G. Imposing a 200% penalty for the risk assumed by Strata in drilling and completing the well against any interest owner who does not voluntarily participate in the drilling of the well.

Respectfully submitted,

MONTGOMERY & ANDREWS, P.A.

/s/ Sharon T. Shaheen

Attorneys for Strata Production Company

Application of Strata Production Co. for Compulsory Pooling, Eddy County, New Mexico. Applicant in the above-styled cause seeks an order from the Division pooling all uncommitted mineral interests in the Delaware formation (FORTY NINER RIDGE; DELAWARE [24750]) in a standard 320-acre, more or less, horizontal spacing and proration unit (“HSU”) comprised of the N/2 S/2 of Sections 27 and 28 , Township 23 South, Range 30 East in Eddy County, New Mexico. Applicant proposes to drill the following well: **Eeyore 27 28 ILL Fed Com 3H** well, to be horizontally drilled from an approximate surface hole location 1720’ FSL and 330’ FEL of Section 27, T23S-R30E, to an approximate bottom hole location 1720’ FSL and 100’ FWL of Section 28, T23S-R30E. The first and last take points and completed interval meet the setback requirements set forth in the statewide rules for horizontal oil wells. Also to be considered will be the cost of drilling and completing the well and the allocation of the costs, the designation of Applicant as Operator of the well, and a 200% charge for the risk involved in drilling and completing the well. The well and lands are located approximately 13 miles East of Loving, New Mexico.

Case No. 24131

AFFIRMATION OF LANDMAN MITCH KRAKAUSKAS

I, being duly sworn on oath, state the following:

1. I am over the age of 18, and have the capacity to execute this Affirmation, which is based on my personal knowledge.

2. I am employed as the Land Manager for Strata Production Company (“Strata” or “Applicant”), and I am familiar with the subject applications and the lands involved.

3. This affirmation is submitted in connection with the filing by Strata of the above-referenced compulsory pooling applications pursuant to 19.15.4.12.A(1) NMAC.

4. I have previously testified before the New Mexico Oil Conservation Division as an expert witness in petroleum land matters. My credentials as a petroleum landman have been accepted by the Division and made a matter of record. My education and work experience are as follows: I graduated from New Mexico State University with a bachelor’s degree in Agricultural Business and Economics in December 2005. After graduation, I worked as an independent petroleum landman from January 2006 to March 2009, working throughout New Mexico, Texas, Colorado and Arizona. I have worked for Strata since April 2009. I have worked on New Mexico land matters for approximately sixteen years. I am a Certified Professional Landman through the American Association of Professional Landmen.

Exhibit A

5. The purpose of this application is to force pool working interest owners into the horizontal spacing units (“HSU”) described below and in the wells to be drilled in the HSUs.

6. In **Case No. 24130**, Applicant seeks an order from the Division pooling all uncommitted mineral interests in the Delaware formation (Forty Niner Ridge; Delaware [24750]) in a standard 320-acre, more or less, HSU comprised of the S/2 N/2 of Sections 27 and 28, Township 23 South, Range 30 East in Eddy County, New Mexico. Applicant proposes to dedicate the HSU to the **Eeyore 27 28 HEL Fed Com 2H** well, to be horizontally drilled from an approximate surface hole location 2240’ FNL and 230’ FEL of Section 27, T23S-R30E, to an approximate bottom hole location 2240’ FSL and 100’ FWL of Section 28, T23S-R30E. The first take point will be located at approximately 2240’ FNL and 330’ FEL of Section 27, T23S-R30E. The last take point will be located at approximately 2240’ FNL and 100’ FWL of Section 28, T23S-R30E.

7. In **Case No. 24131**, Applicant seeks an order from the Division pooling all uncommitted mineral interests in the Delaware formation (Forty Niner Ridge; Delaware [24750]) in a standard 320-acre, more or less, HSU comprised of the N/2 S/2 of Sections 27 and 28, Township 23 South, Range 30 East in Eddy County, New Mexico. Applicant proposes to dedicate the HSU to the **Eeyore 27 28 ILL Fed Com 3H** well, to be horizontally drilled from an approximate surface hole location 1720’ FSL and 330’ FEL of Section 27, T23S-R30E, to an approximate bottom hole location 1720’ FSL and 100’ FWL of Section 28, T23S-R30E. The first take point will be located at approximately 1720’ FSL and 330’ FEL of Section 27, T23S-R30E. The last take point will be located at approximately 1720’ FSL and 100’ FWL of Section 28, T23S-R30E.

8. The first and last take points and completed intervals for all proposed wells will meet the setback requirements set forth in the statewide rules for horizontal oil wells.

9. A general location map is attached as **Exhibit A-1**.

10. Maps illustrating the tracts in the proposed HSUs and the ownership of each individual tract are attached as **Exhibit A-2**.

11. Maps illustrating the unit ownership are attached as **Exhibit A-3**.

12. The ownership breakdowns of interests, the parties to be pooled, and lists of pertinent leases are attached as **Exhibit A-4**. There are no depth severances in the formation being pooled.

13. There are no depth severances.

14. The only interest owner sought to be pooled is WPX Energy Permian LLC (“WPX”).

15. A chronology of contacts with WPX is attached as **Exhibit A-5**.

16. The locations of the proposed wells within the respective HSUs are depicted in the C-102 forms attached as **Exhibit A-6**. The C-102 forms also indicate the locations of each surface hole, bottom hole, and the first and last take points.

17. Strata conducted a diligent search of the public records in Eddy County, New Mexico, where the wells will be located, and conducted phone directory and computer searches to obtain contact information for parties entitled to notification. Strata mailed all parties well proposals, including an Authorization for Expenditure (“AFE”) for each well.

18. **Exhibit A-7** is a copy of the well proposal letter and AFEs for the proposed wells. The estimated costs of the wells set forth in the AFEs are fair, reasonable, and comparable to the costs of other wells of similar depths and lengths drilled in this area of New Mexico.

19. **Exhibit A-8** is a copy of the notice letter that was sent to WPX and the Bureau of Land Management.

20. Strata has made a good faith effort to obtain voluntary joinder of WPX in the proposed wells.

21. Strata requests the Division to approve operating charges and costs of supervision while drilling of \$8,000/month and, after completion, \$800/month, together with a provision adjusting the rates pursuant to the COPAS accounting procedures.

22. Strata requests the maximum cost, plus 200% risk charge, be assessed against non-consenting working interest owners.

23. Strata requests that it be designated operator of the wells.

24. The Exhibits hereto were prepared by me, or compiled from Strata's business records.

25. The granting of the Applications is in the interests of conservation, the prevention of waste, and the protection of correlative rights.

26. The foregoing is correct and complete to the best of my knowledge and belief.

I affirm under penalty of perjury under the laws of the State of New Mexico that this statement is true and correct.

Eeyore 27 28 ILL Fed Com #3H

Eeyore 27 28 ILL Fed Com #3H
NM OCD Case No. 24131
Exhibit A-7

Dear Sir/Madam:

Strata Production Company ("Strata") proposes the drilling and completion of the Eeyore Fed Com 27 28 ADL #1H, Eeyore Fed Com 27 28 HEL #2H and Eeyore Fed Com 27 28 ILL #3H (collectively, the "Wells") located in Sections 27 & 28, Township 23 South, Range 30 East, Eddy County, New Mexico.

In connection with the above, please note the following:

The estimated cost of drilling, testing, completing, and equipping of each well is itemized on the enclosed Authority for Expenditures ("AFE") dated March 1, 2023.

Eeyore 27 28 ADL Fed Com #1H: To be drilled from the legal location with a proposed surface hole location 920' FNL & 450' FEL of Section 27 and a proposed bottom hole location of 920' FNL & 100' FWL of Section 28, Township 23 South, Range 30 East. The well will have a targeted interval within the Brushy Canyon (7626' TVD) and will be drilled horizontally to a measured depth of approximately 17338'.

Eeyore 27 28 HEL Fed Com #2H: To be drilled from the legal location with a proposed surface hole location 2240' FNL & 230' FEL of Section 27 and a proposed bottom hole location of 2240' FSL & 100' FWL of Section 28, Township 23 South, Range 30 East. The well will have a targeted interval within the Brushy Canyon (7623' TVD) and will be drilled horizontally to a measured depth of approximately 17338'.

Eeyore 27 28 ILL Fed Com #3H: To be drilled from the legal location with a proposed surface hole location 1720' FSL & 330' FEL of Section 27 and a proposed bottom hole location of 1720' FSL & 100' FWL of Section 28, Township 23 South, Range 30 East. The well will have a targeted interval within the Brushy Canyon (7616' TVD) and will be drilled horizontally to a measured depth of approximately 17338'.

Strata reserves the right to modify the locations and drilling plans described above in order to address regulatory requirements. Strata will advise you of any such modifications.

Strata is proposing to drill the Wells under the terms of the modified 1989 AAPL form Operating Agreement ("JOA"). The JOA dated July 1, 2022, by and between Strata Production Company, as Operator and WPX Energy Permian LLC, etal as Non-Operator, covers Section 27: All and Section 28: All, Township 23 South, Range 30 East, Eddy County, New Mexico, being 1280 acres, more or less, with the following general provisions:

- 100%/300%/300% Non-consent penalty;
- \$8,000/\$800 Drilling and producing rate;
- Strata Production Company named as Operator from the surface to base of the Delaware Formation.

Strata requests that you indicate your election in the drilling and completion of the Wells on each AFE, sign and return one copy of each AFE to the undersigned within thirty (30) days of receipt of this notice. Please be aware that the enclosed AFEs are only an estimate of costs to be incurred and by electing to participate in the Wells, each working interest owner shall be responsible for its proportionate share of all costs incurred.

Strata is offering the following terms for divesting your interest:

- \$500 per net acre
- NRI delivered equal to the difference between 20% and existing lease burdens

If you are interested in divesting of your interest or wish to discuss this proposal further, please contact myself at (575) 622-1127 ext. 23 or by email mitch@stratanm.com.

Sincerely,

Mitch Krakauskas
Vice President

Case No. **24131** - Application of Strata Production Company for Compulsory Pooling, Eddy County, NM -- **Eeyore 27 28 ILL Fed Com 3H**

Dear Interest Owner:

This will advise that pursuant to NMSA 1978, § 70-2-17, Strata Production Company ("Strata") has filed applications with the New Mexico Oil Conservation Division for orders regarding the proposed wells described below. You are receiving this notice because you may have an interest in these wells.

Case No. 24130. Application of Strata Production Co. for Compulsory Pooling, Eddy County, New Mexico. Applicant in the above-styled cause seeks an order from the Division pooling all uncommitted mineral interests in the Delaware formation (FORTY NINER RIDGE; DELAWARE [24750]) in a standard 320-acre, more or less, horizontal spacing and proration unit ("HSU") comprised of the S/2 N/2 of Sections 27 and 28 , Township 23 South, Range 30 East in Eddy County, New Mexico. Applicant proposes to drill the following well: **Eeyore 27 28 HEL Fed Com 2H** well, to be horizontally drilled from an approximate surface hole location 2240' FNL and 230' FEL of Section 27, T23S-R30E, to an approximate bottom hole location 2240' FSL and 100' FWL of Section 28, T23S-R30E. The first and last take points and completed interval meet the setback requirements set forth in the statewide rules for horizontal oil wells. Also to be considered will be the cost of drilling and completing the well and the allocation of the costs, the designation of Applicant as Operator of the well, and a 200% charge for the risk involved in drilling and completing the well. The well and lands are located approximately 13 miles East of Loving, New Mexico.

Case No. 24131: Application of Strata Production Co. for Compulsory Pooling, Eddy County, New Mexico. Applicant in the above-styled cause seeks an order from the Division pooling all uncommitted mineral interests in the Delaware formation (FORTY NINER RIDGE; DELAWARE [24750]) in a standard 320-acre, more or less, horizontal spacing and proration unit ("HSU") comprised of the N/2 S/2 of Sections 27 and 28 , Township 23 South, Range 30 East in Eddy County, New Mexico. Applicant proposes to drill the following well: **Eeyore 27 28 ILL Fed Com 3H** well, to be horizontally drilled from an approximate surface hole location 1720' FSL and 330' FEL of Section 27, T23S-R30E, to an approximate bottom hole location 1720' FSL and 100' FWL of Section 28, T23S-R30E. The first and last take points and completed interval meet the setback requirements set forth in the statewide rules for horizontal oil wells. Also to be considered will be the cost of drilling and completing the well and the allocation of the costs, the designation of Applicant as Operator of the well, and a 200% charge for the risk involved in drilling and completing the well. The well and lands are located approximately 13 miles East of Loving, New Mexico.

The attached applications will be set for hearing before a Division Examiner at the New Mexico Oil Conservation Division. During the COVID-19 Public Health Emergency, state buildings are closed to the public and hearings will be conducted remotely. The hearing will be conducted on **February 1, 2024**, beginning at 8:15 a.m. To participate in the electronic hearing, see the instructions posted on the docket for the hearing date: <https://www.emnrd.nm.gov/ocd/hearing-info/>. You are not required to attend this hearing, but as an owner of an interest that may be affected, you may appear and present testimony.

Failure to appear at that time and become a party of record will preclude you from challenging these applications at a later time. If you intend to present testimony or evidence at the hearing, you must enter your appearance by **January 24, 2024**, and serve the Division, counsel for the Applicant, and other parties with a pre-hearing statement by **January 25, 2024**, in accordance with Division Rule 19.15.4.13 NMAC.

Please feel free to contact me if you have any questions about these Applications.

Very truly yours,

/s/ Sharon T. Shaheen

Case No. 24130

APPLICATION OF STRATA PRODUCTION CO.
FOR COMPULSORY POOLING,
EDDY COUNTY, NEW MEXICO

Case No. 24131

AFFIRMATION OF GEOLOGIST MICHAEL SCOTT KELLEY

I, Michael Scott Kelley, being first duly sworn on oath, state the following:

1. I am over the age of 18, and have the capacity to execute this Affirmation, which is based on my personal knowledge.

2. I am employed as the geologist for Strata Production Company (“Strata” or “Applicant”), and I am familiar with the subject applications and the lands involved.

3. This Affirmation is submitted in connection with the filing by Strata of the above-referenced compulsory pooling applications pursuant to 19.15.4.12.A(1) NMAC.

4. I have previously testified before the New Mexico Oil Conservation Division as an expert witness in petroleum land matters. My credentials as a petroleum geologist have been accepted by the Division and made a matter of record. My education and work experience are as follows: I have a bachelor’s degree in geology from the University of Oklahoma and a master’s degree in geology from the University of Texas at Arlington. I have been working continuously as a professional geologist since 2009. I worked for two years at Geosite Inc., two years at Panther Energy Company, six years at Pioneer Natural Resources and have been at Strata Production Company for four years.

5. **Exhibit B-1** shows the regional setting for the proposed wells.

- 6. **Exhibit B-2** includes a general stratigraphic column showing the target zone.
- 7. **Exhibit B-3** includes a regional Brushy Canyon structure map with 50' contour intervals, which illustrate the locations of the HSUs in a yellow highlighted rectangle.
- 8. **Exhibit B-4** includes type logs of the production portion of the Brushy Canyon formation. The logs include a gamma ray, a density porosity log, and a deep resistivity log. These are the key logs used to identify and evaluate reservoirs and landing targets for the proposed wells.
- 9. **Exhibit B-5** is a Brushy Canyon structural cross section map showing the location of the cross section on Exhibit B-6 in the region of the proposed wells.

10. **Exhibit B-6** is the structural cross section, indicating that the horizontal section of these wells will be placed in a zone that has an estimated gross interval thickness of 263'. This gross thickness is being calculated from the top of the lower Brushy Canyon formation to the Base of the lower Brushy Canyon formation (top of Bone Spring formation). The total thickness of the Brushy Canyon formation in this area is approximately 1679'. Perforations and completions are planned where reservoir quality sands are present through the vertical portion of the wellbore within the greater Brushy Canyon formation.

11. The measured depths and true vertical depths for each well are approximately as follows:

Case No.		MD	TVD
24130:	Eeyore 27 28 HEL Fed Com #2H	17,540	7,674'
24131:	Eeyore 27 28 ILL Fed Com #3H	17,540'	7,677'

12. The true vertical landing depths of the target formation for Case Nos. 24130 and 24131 are approximately 7674' and 7677', respectively, based on the structural cross section, **Exhibit B-6**.

13. Based on my geologic study of the area, I conclude the following:
- a. The horizontal spacing and proration units are justified from a geologic standpoint.
 - b. There are no structural impediments or faults that will interfere with horizontal development.
 - c. Each quarter-quarter section in the HSU will contribute more or less equally to production.
 - d. The most efficient way to develop the acreage in each case is as proposed due to surface location limitations due to potash drill islands, and appropriate well spacing for the Brushy Canyon formation. There is no known and generally accepted preferential drilling orientation based on present-day stress regime or other geological factors that would counter the proposed East-West well orientation. Successfully developed Brushy Canyon formation horizontal wells oriented East-West have been drilled in the region, so an established trend is present. This orientation also fits our lease boundaries and aligns with the remainder of Strata's planned development in the adjoining tracts. Therefore, the preferred well orientation does not strand any acreage or reserves.
14. The exhibits attached hereto were prepared by me or compiled from Strata's business records.
15. The granting of the Applications is in the interests of conservation, the prevention of waste, and the protection of correlative rights.
16. The foregoing is correct and complete to the best of my knowledge and belief.

I affirm under penalty of perjury under the laws of the State of New Mexico that this statement is true and correct.

**APPLICATION OF STRATA PRODUCTION CO.
FOR COMPULSORY POOLING,
EDDY COUNTY, NEW MEXICO**

Case No. 24131

AFFIRMATION OF NOTICE

I, Sharon T. Shaheen, attorney for STRATA PRODUCTION COMPANY (“Strata”), Applicant in the above-captioned matter, state the following:

I caused notice of the applications to be sent by certified mail through the United States Postal Service on December 28, 2023, to the only interest owner sought to be pooled in these proceedings, WPX Energy Permian LLC, and to the Bureau of Land Management. Evidence of mailing and receipt is attached hereto as Exhibit A, which demonstrates to my satisfaction that all interest owners entitled to notice have been properly served.

Strata has conducted a good faith, diligent effort to find the names and correct addresses for the interest owners entitled to receive notice of the Application filed herein.

I affirm under penalty of perjury under the laws of the State of New Mexico that this statement is true and correct.

/s/ Sharon T. Shaheen
